

TRADITIONAL PROGRAMS VS. REGGIO EMILIA

• TRADITIONAL •

Teachers speak at the children and use theme-based learning, changing teacher-selected topics weekly, regardless of student interest.

If a student still wants to explore, they must move onto the next topic regardless.

Single method of teaching all children.

Children wait to be educated. Different learning styles are not embraced.

• REGGIO EMILIA •

Teachers explore different subjects based on the children's interests, working alongside them.

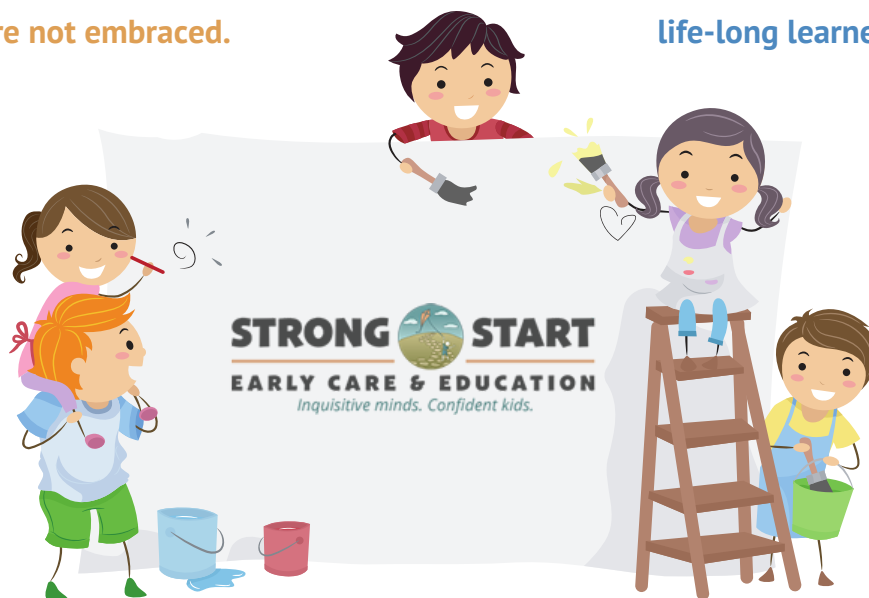

Children learn more about subjects they are curious about before moving onto a new interest.

Teaching with the unique needs of each child in mind.

Children flourish and become life-long learners.
