

Our installed solar screen pricing from our DIY Estimate Worksheet is for the area within the RED outline. Outside of that area we either do not service, or we do so for a reasonable additional cost. If you live in one of these areas outside of our in red service area, and your order is for less than 3,000 inches (see our DIY Estimate Worksheet), the noted dollar amount is the additional cost to service your area. If you live in one of these areas and your order is for 3,000 inches or above, we will waive this additional cost. For the areas not outlined in black, noted as N/A, those are areas that we are not able to provide services for.
