

Pipe pillows have been designed to help support risers, eliminate line failure at pipeline crossings where support is required.

Utilized inside tank containments to support production lines and not damage the liner.

Pipe Pillows

Environmentally Friendly

Ground Support for Safer Pipelines

MADE IN CANADA

403-877-5883

PIPE PILLOWS

- Manufactured from 100% recycled rubber
- Designed to safely support pipelines and durable enough to last the life of the pipeline
- Environmentally inert yet softer than most pipeline coatings
- The design shape is able to transfer extreme loads very effectively through to virgin soil beneath. For softer ground conditions, **Ecoraster®** is available to further distribute the load.
- Stackable for various height requirements
- Light enough to handle yet dense enough to resist flotation
- Easy to handle and install
- Inexpensive
- Available in 2" - 6" and 8" - 10" Profiles
- Available exclusively from B8 Ventures Ltd. (patent pending)

ADVANTAGES

Designed specifically for the industrial sector. Offering pipe support solutions for:

- Pipeline risers
- Headers
- Line crossings
- Load lines
- Storage tank containment lines will not damage liners
- Replaces expensive pilings and sandbags that deteriorate
- Installation doesn't require any specialized training
- Increased productivity and site safety

ADDITIONAL USES

Designed as a stable, long-lasting support for pipelines in trenches, Pipe Pillows also work extremely well outside the trench:

- As a pipe support during the stringing processes
- As an effective means to support exposed pipelines during and following integrity digs
- As a low level pipe support when stockpiling pipes.

Dimensional Data

Size Inches	Weight lbs	Pipeline Height per Stacked Pipe Pillow			
		2	3	4	5
2-6 inches	13.5 lbs	6"	9.5"	13.25"	16.75"
8-10 inches	13.5 lbs	6"	9.5"	13"	17"
