

Neuropathy

Get Rid of Irritating Numbness and Pain in Your Legs and Feet with FDA-Cleared Treatment

Finally a Solution for Peripheral Neuropathy

If you suffer from pain due to Peripheral Neuropathy; tingling, numbness, or you can't even feel your feet; we invite you to call our office and schedule an appointment to learn more about the latest treatment available. More than 20 million Americans suffer from Peripheral Neuropathy, a condition caused by damage to the nerves. This pain affects everything that you do, your work, your play and ultimately your quality of life. At Puget Sound laser centers we use state-of-the-art, FDA cleared treatments that have helped thousands of neuropathy sufferers find relief, and return to an active quality-of-life.

There are many symptoms of Peripheral Neuropathy, which is essentially damage to the peripheral nerve system. Some would describe it as wearing an invisible "glove," extreme electric-like sensitivity to the touch, burning, or walking on pins and needles.

Symptoms of Neuropathy:

- Numbness
- Leg cramping
- Sharp electrical-like pain
- Difficulty sleeping from leg & foot discomfort
- Prickling or tingling of the feet or hands
- Burning pain
- Pain when you walk

Is there a lasting treatment for the symptoms of Neuropathy?

Treating a problem by masking the symptom has never been a viable long-term solution. Previous treatment options for Peripheral Neuropathy have been a small handful of pain medications. This type of pain relief is temporary. Often these treatments lead to even more health problems or worse yet—addiction. So many people innocently fall into abusing pain pills while initially using them to alleviate the pain. It's time to look into a solution to your pain that does not involve prescription pain pills.

Neuropathy may contribute to emotional stress and depression

Many people suffering with pain don't realize that the symptoms could be due to Peripheral Neuropathy. It is a condition that can be misdiagnosed or ignored until it is unbearable. This can affect all aspects of your life and may even cause emotional stress or depression. Why suffer longer than you need to? If you feel that your symptoms may be caused by Peripheral Neuropathy, call and schedule your appointment today. If you are experiencing severe pain, take action now! Don't let pain control your life!

The solution: Puget Sound Laser Centers' customized treatment protocol

Our advanced drug-free program for treating Peripheral Neuropathy uses a combination of specialized treatments with breakthrough technology that aids in healing the damaged nerves. The effects of this program can be felt on the first few visits. This treatment restores, stabilizes, and rebuilds the nerves in your extremities. Treatment has also been effective in treating painful symptoms of arthritis and other forms of chronic pain. Patients generally feel relief physically throughout the treatment period and even feel better emotionally after experiencing a reduction in pain.

When considering your options, ask yourself this question... If there is a solution to Peripheral Neuropathy that can give me relief and address the problem instead of the symptoms, is it worth exploring?

Not all Neuropathy treatments are created equal

The Peripheral Neuropathy Therapy at Puget Sound Laser Centers incorporates the latest FDA-Cleared

technology proven to reverse the symptoms of Neuropathy. When dealing with your pain, remember that there is a non-surgical treatment with little discomfort and no prescription drugs which is a real option for lasting relief. Thousands of patients have seen amazing results including a reduction in pain using our customized treatment protocol.

Find out if you're a candidate for this treatment

There are several conditions that can be treated including burning pain, shooting pain, balance problems, sensations of walking on broken glass, and much more. If you have pain in your feet or legs, you may be a candidate for these new treatment breakthroughs.

Why choose Puget Sound Laser Centers'?

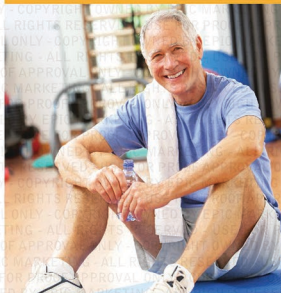

Puget Sound Laser Centers offers some of the most advanced non-surgical, FDA-Cleared procedures for relieving chronic pain. Our customized approach offers the latest medical technology. We offer programs and procedures that will improve your health with the utmost safety and precision. We will provide you with an accurate diagnosis and recommend a program that best fits your needs.

From your first visit when you meet our friendly staff and complete a tour of the office, you will get a sense of our deep commitment to your health and to you as a person. We will customize a program specifically for your needs and conditions. Instead of only treating your symptoms, we treat the cause. We do this by identifying the best treatment for your specific situation, and helping you to form lifelong habits that will improve your entire way of life.

Free consultation and Evaluation

Even with these exceptional treatments, if someone's condition has progressed too far, conservative treatment may no longer be an option and we would not be able to accept them for care. Fortunately, we are able to help most of the people who come to us suffering from chronic pain. To find out if you are a candidate for treatment, we are offering a consultation and screening evaluation free of charge. There is no obligation. This will allow us to determine whether or not we can help you. We will give you a straight answer either way. The only thing you have to lose is your pain. Due to demand we are extending this offer to the first 30 callers only. Time slots fill quickly, so call today to reserve your complimentary consultation and screening evaluation. CALL TODAY.

What are patients saying?

"THANK YOU for allowing me the opportunity to enjoy life without the almost constant pain from my neuropathy. The results have been wonderful. After just a few days, I began to notice a big difference in the way my legs felt. I started sleeping better and was able to walk better. I plan on telling everyone that I find out has diabetic peripheral neuropathy about this treatment."

— Dale F. Tacoma, WA
