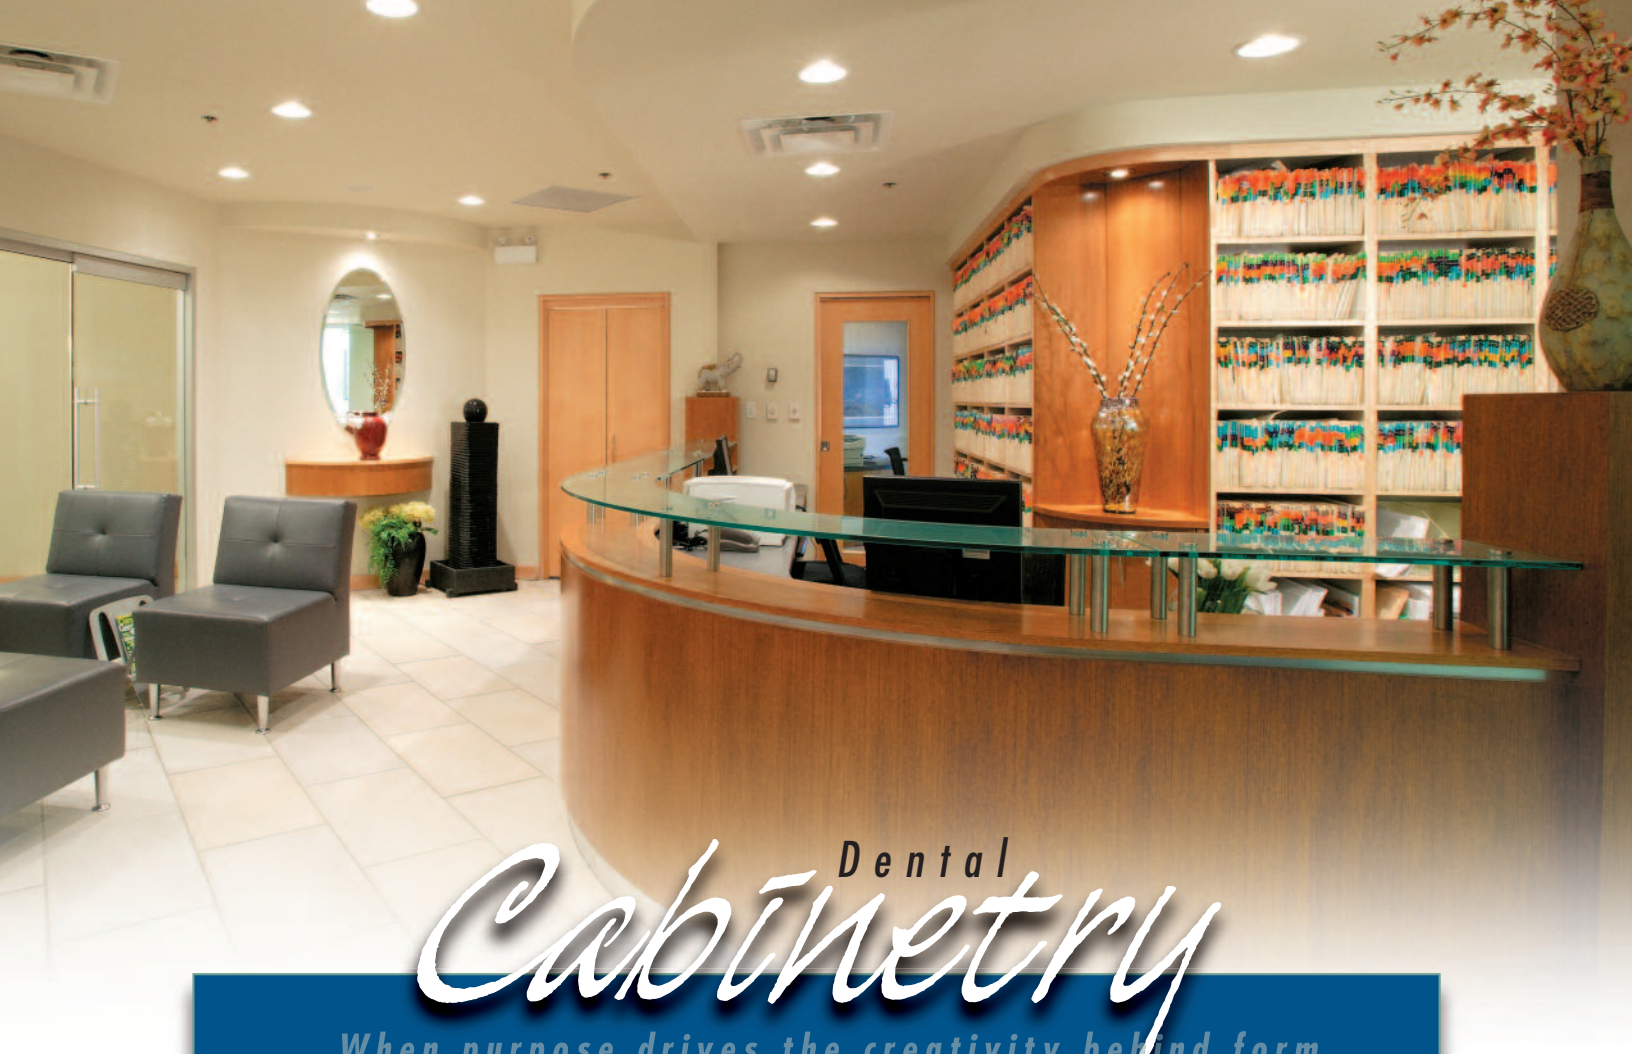
Designed to fit. Built to perform.



Dental Cabinetry

When purpose drives the creativity behind form, and beauty harmonizes with natural movement... it's unparalleled perfection.

Welcome to Bow Wood.

The company that specializes in designing and crafting beautiful dental cabinetry. That's our focus. So you're free to choose whatever equipment you like and we'll make it fit like a dream. What we're about is making extraordinarily, well-made dental cabinets that help you work better and give your environment an unmistakable sense of class. Our strength is listening to what you want... so you get remarkable cabinetry that makes your surroundings unbelievably beautiful.

Introducing our "Signature" Collection. The collection that is designed to enable you to create a unique office. Your office. Designed to fit. Built to perform. Principals that are paramount in the world of dentistry, and ours too.

BowWood Signature Series

TWO YEAR WARRANTY

We believe in what we build so much that we put our warranty where our mouth is. Our two-year warranty is industry leading. It's also seldom used, because our cabinetry is so well built in the first place.

CUSTOMIZABLE

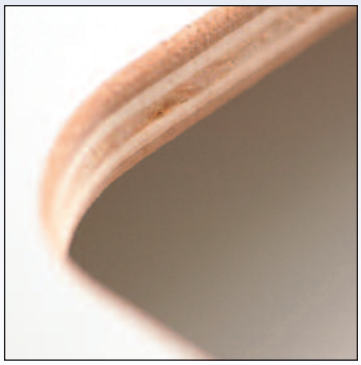
Do you want a different drawer configuration? A different place for a latex glove dispenser? Our designs aren't about cookie-cutter formats. They're about giving you designs that are effective for you and your workflow.

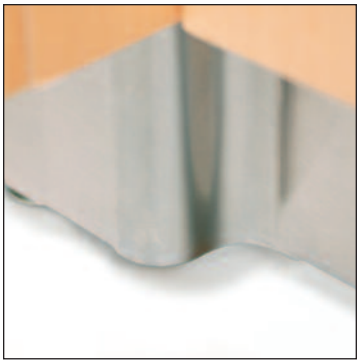
POST FORMED PLASTIC LAMINATE

We don't corner, we round. We avoid 90˚ corners in our doors, drawer fronts and support columns. Increases durability and asepsis qualities. Reduces chipping. And looks good.

PLYWOOD CONSTRUCTION

Insides count. For increased strength, our cabinet bottoms are real plywood. It's water-resistant and the access openings in the bottom allow easy routing of equipment conduits/cables.





GLASS WINDOW TREATMENT

Choose our seamlessly designed windows on the front, back or both. Designed with elegant detail, each window is handcrafted for a smooth, clean look and fine borders.

STAINLESS STEEL SINKS

Bow Wood uses stainless steel basins so they always look shiny; instruments don't scratch; and stains don't show. Undermounted so water doesn't collect. Durable foot-activated faucets available.

STEEL BASE

Our one-piece, welded, five-inch-high kick box is not only strong…it's also waterproof. It incorporates our heavy-duty adjustable feet for levelling as well.

SOLID SURFACE

There's nothing like the real thing. Solid surfacing gives your countertops one of the best surfaces out there. And, if anything happens to it, it usually can be fixed like brand new. Now that's good.

Form and Function

When form and function thrive within a singular design focus, something remarkable happens... purposeful, permanent elegance.

To us, a dental cabinet is a series of details that embrace more than form and function—they must also be inspiring in appearance and built with exquisite workmanship. And because building dental cabinetry is our focus, you know you're getting concentrated quality in every design, every piece, every detail.

DUO SWING TABLE

Did you know that 30% of dentists are left-handed? That's why our swing table can accommodate ambidextrous delivery systems for the dentist and the assistant. Now that's handy.

SIDE SWING TRAYS

Versatility. That's the word of the day. Our swing trays significantly increase storage surface for ancillary equipment, such as curing lights, so they're easily within reach.

ASSISTANT'S INSTRUMENTATION

A Bow Wood innovation. Our double-jointed arm makes it easy for assistants to position their instruments where they want them. Plus, our solids collector is simple to access and clean.

PULLOUT SURFACE

Strong. Stable. Versatile. Those are just three words to describe our pullout work surface. Push it in. It disappears. Pull it out and your assistant has an extra work area that locks. Ask for our dual pull out option.

Optional Design Configurations

RS 42" WITH

Smart Environment

Is it possible to think beauty into being...
to turn purpose into a stunning "Pas de deux"
with design...to amplify elegance? Yes, it is.

The smarter a cabinet is built, the longer it will last, the sturdier it will be and the more efficient your office will be. For example, we build our cabinets so you can use any type of equipment you want. Because versatility is extremely smart.

STEEL COLUMNS

Strength matters. Especially when a steel column is holding up your expensive x-ray. We use the strongest column in the industry so our cabinetry doesn't flex and x-rays don't drift.

X-RAY ENCLOSURE

You have the option to conceal the x-ray machine and have ops private at the same time. Also, our enclosure lets one machine be shared between two ops.

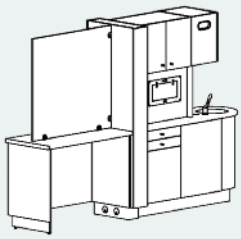
LIGHT CHOICES

Our steel columns are compatible with operating lights from any manufacturer. Plus, our ladder-frame construction means easy access for equipment installation and servicing.

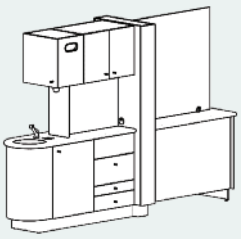
EXTRA HEIGHT

Not everyone is at the same height in this world. We can build our cabinetry to be 88″ high versus the standard 72″. It increases privacy between ops.

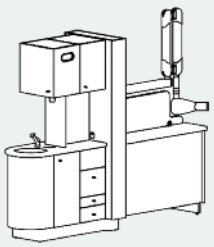
Optional Design Configurations



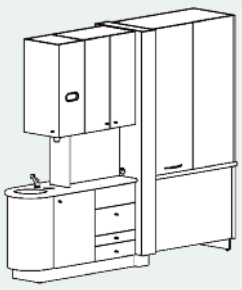
CIR, 106″ SHOWN
DOCTOR'S SIDE



CIR, 106″ SHOWN
ASSISTANT'S SIDE



CIR, 90″ SHOWN
WITH X-RAY



CIR, 88″ TALL
X-RAY ENCLOSURE

CIR, 1/2 ISLAND
88″ TALL

Flowing Design

Our designs flow from what you need. We weave purpose and beauty into your environment...while remaining exceptionally flexible.

Beautifully designed dental cabinetry creates a feeling of well being for your patients, and in turn, becomes the foundation for successfully marketing your image. And, let's face it, beauty affects staff morale in a good way, too. That's never a bad thing.

UNDERMOUNT SINKS

Life is in the details. Details like undermounting sinks so there's no lip above the counter for germs or waste to get caught under. It's the right thing to do…so of course, we do it.

UPPER STORAGE

Storage is paramount in an office, so our upper cabinets give you as much room as possible, while remaining space-savingly smart.

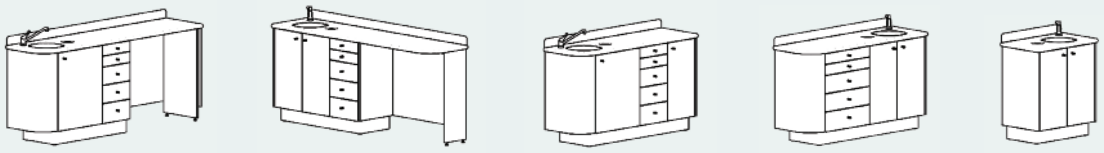
GLOVE/CUP DISPENSERS

Our upper storage can come with time-saving glove and cup dispensers so you never have to open a door to get what you need and risk contamination.

ROUND END

We round our end corner to give you more room to get in and out of your operatory and more wheelchair accessibility. Plus, if we do say so ourselves, it looks really smart.

Optional Design Configurations



DRSL DRSR ASTL ASTL-T WS

Your Workspace

Intuitive design with organic movement in mind...flow and process management... productivity...your goals as well as ours.

Time-Saving Design. The term "workspace" means your space needs to work well for you. Including your cabinets. We take every movement into account when we design our cabinets. Because saving seconds, saves hours.

SOAK DRAWERS

Opt to soak in a drawer, instead of on the counter. Our soak drawers are designed for cold sterilization and easy clean out. Add an extra High Volume Evacuator (HVE) for even snappier and mess-free draining.

BLUE OR RED LIGHTS

Our Sterilization Centres can also be outfitted with blue and red lights for increased patient awareness of the aseptic process. So, give us the green light to put blue and red lights in for you.

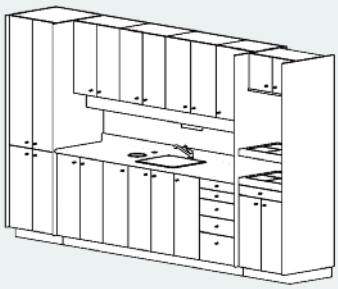
SOLID SURFACE PULLOUTS

Solidly waterproof. Our grooved solid surface tower pullouts make sure any moisture that drips down during sterilization stays exactly where it's supposed to. Because containment is where it's at.

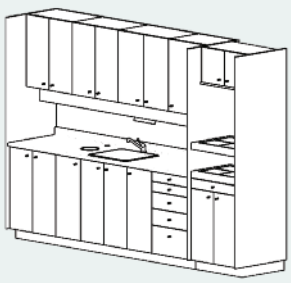
MAXIMUM TRAY STORAGE

We designed wire racks so they give you the maximum amount of storage space possible. They're chrome, long-lasting…and they're adjustable.

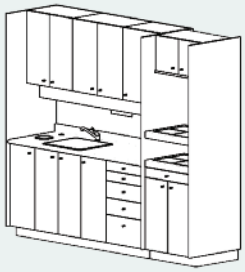
Optional Design Configurations



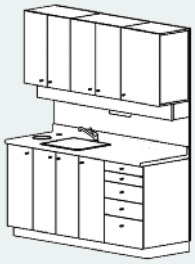
SC12



SC10



SC8



SC6

Custom Cabinetry

There are three things to remember about our remarkable Bow Wood dental cabinetry: Customizable, Customizable and Customizable.

Before you buy Bow Wood cabinets, you get to see the design of the cabinetry drawn out beforehand.
So, if you want a drawer a bit bigger, or moved here…or there, no problem, we'll give you a preview.

RS2 PEX

We salute the previous cabinetry that has served you well and is ready to retire. Our RS2 PEX replacement unit can step in to fill the void in both size formats. Available with fully ambidextrous controls, they can also accommodate all major brands of doctor's controls. Each unit is made to order to suit individual requirements (a.k.a., it's customizable).

MOBILE CARTS

Our mobile carts are made with the finest material and meticulous craftsmanship. The best thing about them is that they're fully customizable.

ORTHO CARTS

Each dentist we design cabinets for has their own style and approach to things. We can customize right down to the instrumentation panel. Because what works best for you...is what works best for us.

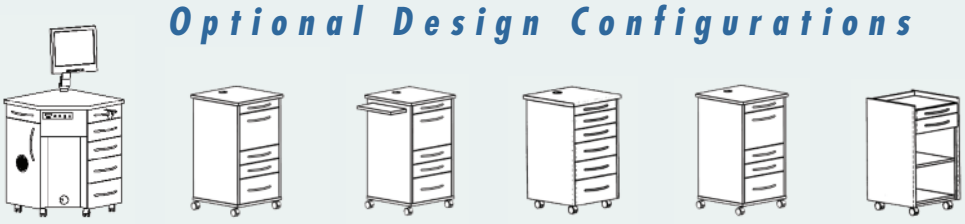
ROUNDED BACK

A rounded back to a mobile cart is truly a Bow Wood signature option. It looks elegant, and functionally, the rounded corners naturally stay out of your way. They don't get caught on anything, so there's less chance of chipping and will look very good for a long time.

PASS THROUGH X-RAY CABINETS

Want cost-effectiveness by having ops share the same x-ray equipment? Our Pass Through x-ray cabinets are the right choice to make.

Optional Design Configurations



ORTHO ALABAMA NORTH CAROLINA DOCTOR'S ASSISTANT'S UTILITY

Designer Colours

Choose a colour and you're choosing a mood, a statement, a mindset. That's why we offer a colour choice as big as the sky.

Colour matters. If you can dream up a colour or a countertop, more than likely we can match it. Need to meld with what your interior designer recommends? No problem. Want to match some existing cabinetry? Absolutely. Want glass, quartz or stainless steel countertops? Go ahead, colour your world.
