WHY SELL CORE PRODUCTS UUR?

- UUR is not sold in major retailers to compete against - Clorox is in Wal-Mart, Lowe's, Home Depot and most retail stores
- We monitor distribution for customer protection
- Our product can be private labeled, Clorox won't
- Clorox is low in pH and acidic - which can break down grout and natural stones
- UUR has higher percentage of Hydrogen Peroxide to boost effectiveness
- We use a natural essential oil for fragrance

WHY URINE STINKS!

Urine is composed of waste products including urea, uric acid, sodium chloride (salt), excess water and other waste. The immediate odor from urine comes from bacteria that feed on urine. Uric acid crystals (crystallized urine residue) often remain in porous surfaces, and will emit an "ammonia" odor with time. Humid conditions or wetting the surface can also reactivate the odor.
