

SUCCESS STORY

MARY STAZI
President

The Computing Center

Ithaca, New York

“The Computing Center has provided innovative and cost-effective technology-based solutions to businesses and professionals in Central New York.”

The Problem:

Everybody knows if you are going to do cybersecurity, you must go all in and not just as a niche, so our goal was to partner with another firm we can trust, has integrity, and does business the way we do.

The Solution:

We wanted a focus, not just to dabble in security. Cyberstone allows us to maintain that focus. Secondly, for most of our clients, we are their IT staff, so for best practice's sake, we didn't want to grade our own work since it is a conflict of interest.

The Benefit:

Our clients love that we can bring in a trusted partner to do their security.
