

JOSHUA MCCOY

Program Manager

SUMMARY

Josh McCoy is a seasoned project executive with over 18 years of civil construction, disaster recovery and residential construction experience. He has a proven track record of leadership in strategic planning, operational excellence, process improvements heavy / civil construction and construction management. Josh has provided emergency response, disaster recovery and construction management services to state, municipal and private sector clients. His functional experience includes managing project scopes, schedules, budgets and change orders. Josh is adept at managing large teams comprised of supervisors, field crews and multiple subcontractors. He has coordinated several fast-paced civil and residential construction projects with many field crews spread across large geographic areas. His technical experience includes project management, construction management, estimating, scope development, inspections, damage assessments, and procuring materials and supplies.

NOTEABLES

- CDBG-DR Restore Louisiana Program, Project Director - Project Director for FEMA-funded housing rehabilitation and reconstruction program. Currently providing oversight of project closeout process. At peak, managed 6 subcontractors and over 300 field personnel. Responsible for client relations, coordinating with the Program Manager, managing subcontractors and procuring materials.
- Puerto Rico STEP Emergency Housing Repairs Program, Executive Sponsor – Executive Sponsor overseeing repairs for the largest FEMA-funded residential repair program in the history of US disaster recovery efforts. Responsible for overall program oversight, including but not limited to client relations, team leadership, production management, quality and contract management.
- Louisiana Shelter at Home Program, Project Director- Project Director of FEMA-funded temporary housing repairs program overseeing the execution of emergency repairs to 1,200 homes affected by the 2016 Louisiana Floods. Negotiated material and supply discounts for multiple contractors to leverage volume pricing and expedited delivery to meet aggressive project deadlines. Scope included cleaning, sanitizing, electrical restoration, plumbing, removing wet insulation & drywall, privatizing bathroom and restoring cooling systems.
