

Shaping Strong, Confident, and Inspirational Children

INTELLECTUAL DEVELOPMENT In Preschool and Kindergarten Children

At East Valley Christian School, we believe that giving high-quality family childcare means we must excel at supporting each child's social, emotional, physical, and intellectual development. Early care and development is key to who children become as individuals. To achieve each child's needs parental involvement is essential—so, we work together with parents so children master the early competencies and skills needed for elementary and middle school.

Stimulating Intellectual Development

The first five years of a child's life is a time of exceptionally fast neurological growth. During this critical time, it is important to establish a sound foundation that will support the development of a child's cognition and character. At East Valley Christian School, we believe children will lead healthier, productive, and successful lives, the stronger their cognitive and character foundation they have to grow on.

Are Your Children in the Right School?

Children educated and cared for in environments that foster their growth empower them to reach the fullness of their potential. The unique blend of study elements stretches our students intellectually, socially, and emotionally in a rich climate of cultural diversity. We cultivate a child's desire for learning and teach them that learning is an exciting lifelong process. We also focus on the children's communication and reasoning skills, which are essential for a productive life.

Looking at Academic Performance

Our preschool and kindergarten grades have as their primary academic goal the acquisition of basic skills, such as reading, writing, spelling and math computation, within the academic disciplines of language arts, mathematics, social studies, science, religion and the arts. While intellectual ability is needed, an individual's moral judgment, behavior, and community citizenship are equally important. Initially, children learn to read and as they get older they read to learn.

Let's Talk About Your Child's Intellectual Development

We would be delighted to talk with you as you seek to provide the best care and private education available for your family. Please feel free to call us to discuss your goals, so we can learn how we may best assist you.
