

Pricing and Insurance Claims

Pre-payment is required for all testing at this time. We are not currently enrolled with any insurance companies. However, we are happy to file an out-of-network insurance claim as courtesy on the behalf of the patient. If you would like us to submit a claim to your insurance provider after test completion, please include a copy of the front and back of your insurance card with the test order. If Medicare is your primary insurance, no pre-payment is required.

Test Panels (Pricing reflects discounts for multiple tests)

Name & Description	CPT coding	Price
<i>Bartonella spp</i> ePCR™ Triple Blood Draw + IFA Panel, IgG (<i>B henselae</i>, <i>B quintana</i>)	87040, 87471-59, 87471-91, 87150 (billed on each date of service), 86611, 86611-91	\$995
<i>Bartonella spp</i> ePCR™ Triple Blood Draw	87040, 87471-59, 87471-91, 87150 (billed on each date of service).	\$910
<i>Bartonella spp</i> ePCR™ Single Blood Draw	87040, 87471-59, 87471-91, 87150	\$505
<i>Bartonella spp</i> ePCR™ Fresh/Frozen Tissue	87075, 87471, 87150	\$458
<i>Bartonella spp</i> ePCR™ Non-blood Fluid	87075, 87471, 87150	\$375
<i>Bartonella</i> IFA Serology Panel, IgG <i>B. henselae</i>, <i>B. quintana</i>	86611, 86611-91	\$260
<i>Borrelia burgdorferi</i> ELISA IgM/IgG Panel, reflex to Western Blot Panel, IgG/IgM (Lyme Disease) *	86618, 86617	\$290
Tick-borne Disease PCR Panel <i>Babesia spp</i>, <i>Ehrlichia spp</i>, <i>Anaplasma spp</i>, and <i>Rickettsia spp</i>.	87798-91 x4	\$615

Test turnaround is 3 weeks for ePCR testing and 2 weeks for serology and PCR testing. Positive PCR results are confirmed by DNA sequencing and species identification.

* Reflex testing occurs when an initial test result meets the pre-determined criteria of positive or equivocal. Initial charge is \$85 with an additional charge of \$205 if the reflex test is performed.

DNA Tests (active infection)

Name & Description	CPT coding	Price
<i>Anaplasma</i> spp PCR	87798	\$230
<i>Babesia/Theileria</i> spp PCR	87798	\$230
<i>Bartonella</i> spp PCR (paraffin-embedded tissue only)	87798	\$310
<i>Ehrlichia</i> spp PCR	87798	\$230
<i>Rickettsia</i> spp PCR	87798	\$230

Test turnaround is 2 weeks for PCR testing. Positive PCR results are confirmed by DNA sequencing and species identification.

Antibody Tests (prior exposure)

Name & Description	CPT coding	Price
<i>Bartonella henselae</i> IFA Serology, IgG	86611	\$140
<i>Bartonella quintana</i> IFA Serology, IgG	86611	\$140
<i>Borrelia burgdorferi</i> ELISA, IgG/IgM (Lyme Disease)	86618	\$85
<i>Borrelia burgdorferi</i> Western Blot, IgG/IgM (Lyme Disease)	86617	\$230

Test turnaround is 2 weeks for serology testing.
