Colonial Grid

Contour Grid

Essentials Double Hung windows tilt in for easy cleaning.

Safety and Security are the Essentials

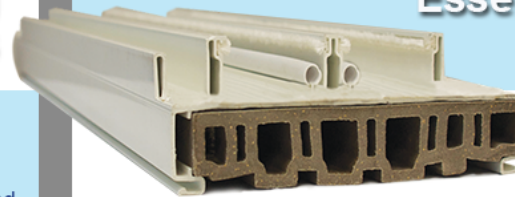

- Essentials Windows feature twin heavy-duty security cam locks* for greater security
- Essentials Double Hung and Sliding windows feature convenient vent latches that allow you to limit the opening of the sash to enjoy the fresh air while keeping the safety of children on the inside.

* On Essentials Double Hungs 30" in width and greater and on Essentials Two-Lite Sliders 30" in height or greater

The Essentials Two-Lite Slider brings wide and beautiful views into your home while keeping the elements out. Each sash glides on two tandem rollers for years of effortless operation. (Shown in Painters White)

Essentials Sliding Patio Door with EverCore Composite Frame

Built to Perform and Withstand the Elements

The Essentials Sliding Patio Door offers superior performance at a remarkable value. Easy-gliding composite wheels provide easy operation and years of worry-free performance, while optional keyed locks and footbolt provide added security.

With our exclusive EverCore composite frame, the Essentials Sliding Patio Door frame is resistant to moisture, rot and decay. Stronger than wood without the worry of rotting.

Save Money on Heating By Keeping the Cold Air Out

Air infiltration rates measure how much air comes through a closed and locked window assembly; the lower the number the more efficient the window. Below are air infiltration rates of some common options for replacement windows.

Latitude Glass
WITH SUMMIT TECHNOLOGY

Exclusively from Sunrise Windows

How does Summit Technology work?

Latitude Glass with Summit Technology is a high performance glass system designed specifically for applications at higher altitudes. This high-efficiency glass system legitimately qualifies for Energy Star at any altitude and will never decrease in efficiency.

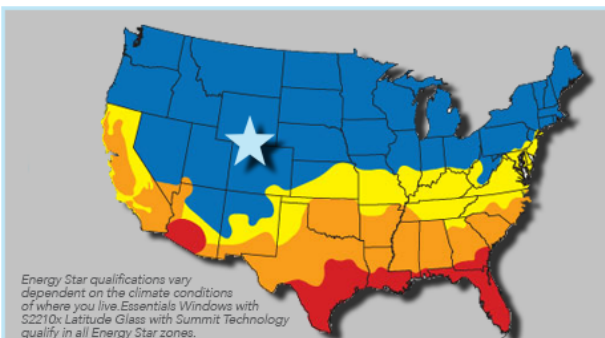

Low-E and Argon has been the standard for years. Unfortunately, Argon gas dissipates. While the dissipation rate varies among windows, they all dissipate, resulting in your new Low-E and Argon windows becoming less efficient every year.

Summit Technology is a cutting edge technology that incorporates indium-oxide: the same coating used on your smart phone. It's a permanent coating that reflects thermal energy back to the origin source. Have you ever noticed that you're unable to operate your smart phone with gloves on?

Your Essentials Windows with Summit Technology will maintain the same high-efficiency year after year, making them your best choice for performance and value.

Your Best Choice for Performance and Value

What is most important to you when considering investing in new windows and doors? Are you looking for quality and value or efficiency and performance?

Essentials Windows from Sunrise Windows offers you everything you *essentially* need for value and efficiency.

The National Fenestration Rating Council's (www.nfrc.org) Energy Performance Label provides consumers with trusted third party testing data to help them compare the overall efficiency performance of different brands of windows and doors so that they can make an informed decision when it comes to investing in replacement windows. Essentials Windows by Sunrise Windows are tested to these exacting standards and are considered to be one of the best performing windows systems for the value.

Peace of Mind

When you purchase Essentials, your windows and doors are backed by the best warranty in the business.
