

Introducing THE FASTT PATCH™

ACCELERATED HEALING

The FASTT Patch™ is a topically applied natural herbal product. It is made of a scientifically designed herbal mixture attached to the highest grade of latex-free, hypoallergenic medical grade adhesive tape. Herbal ingredients are absorbed through the skin, greatly accelerating the healing for acute and chronic muscle, ligament, bone, and tendon injuries.

The patch speeds up recovery by increasing blood flow and lymphatic circulation at the site of injury. It also enables the body to perform other key biological processes necessary for tissue repair. Most patients achieve full recovery five to ten times quicker than the normal healing time.

✓ **SPRAINS & STRAINS**

Patients with first-degree sprains or strains can expect a rapid recovery within 24 to 48 hours. For second-degree sprains and strains, recovery will normally take up to 5 days. Noticeable pain reduction typically begins within a few hours after using the FASTT Patch™.

✓ **BONE FRACTURES**

The FASTT Patch™ accelerates the healing of all types of fractures in just 8 to 17 days, including ribs, collar bone, wrists, fingers, stress fractures, non-union fractures, and compound fractures.

✓ **TENDINITIS**

The FASTT Patch™ helps to heal tendon tears and repair cellular damage for tendinitis cases. Acute tendon tears and tendinitis can expect a rapid recovery in 8 to 17 days. Chronic tendinitis (tendinosis) can be addressed in just one to two months with the use of the FASTT and WHITEE Patches™.

CONDITIONS

The FASTT Patch™ addresses

- Muscle Tears
- Carpal Tunnel Syndrome
- Tennis Elbow
- Rotator Cuff Tears
- Achilles Tendinitis
- Bursitis
- Plantar Fasciitis
- Sports Injuries
- AC Joint Separations
- ACL Injuries
- MCL Injuries
