Lumber market winds turned more significantly this week from tail to head. Lack of inventory build at the retail and secondary levels has buffered the severity of the market drop as we near the start of the holiday season. Lumber futures are back on the rise, and the cash market is too. DF 9-ft studs have tightened and saw a significant increase. OSB and western fir plywood are still showing cracks, while SYP plywood continues to rise. Mill curtailments are up next, tightening output. If demand stays robust through the holidays, look for higher prices.
