Prices are F.O.B. mill, excluding freight

Images of winter weather, especially in Texas, filled our screens this week while we watched lumber and especially panel prices continue on their upward track. In a normal year, weather like this would create a market dip. Not the case this year as we continue to face supply issues on almost everything. Reports that some families in power-stricken Texas had resorted to burning children's wooden toys for warmth caused OSB and lumber mills to raise prices. Not really. But that's about how ridiculous it's gotten out there. We will need to see some slow down and some inventory build before there is any sign of a change in the market. CME Futures tell us that the money is on this continuing into summer.
