

IEO Energy has eliminated the financial obstacles for commercial, industrial, and municipal organizations to convert their high-cost energy consuming equipment into an advanced, energy efficient system with our Energy Efficiency-as-a-Service (EEAAS) program. Our clients have found the EEAAS program as an excellent opportunity to enhance their facilities' lighting, HVAC systems, chilling components, building controls, or any approved energy savings technologies. This program provides a true 'No Capital Cost' opportunity to convert your facilities into an advanced energy savings technology system...it's Simply Brilliant!

- 
- No Capital Cost
 - Cash-flow Positive Month One
 - Full Service & Maintenance
 - Off Balance Sheet

Key Benefits

- **No Capital Investment** - Our program pays for the energy savings technologies including products and installation with zero upfront cost
- **We Service the Equipment** - Throughout the entire term we service the equipment and eliminate any current and future maintenance or labor costs
- **Keep the Rebates** - Our clients keep 100% of any cash rebates provided by the utility provider

No Risk

- **Off Balance Sheet Program** - 100% of your service payment can be deducted as an expense against your revenue monthly
- **Savings Guaranteed** - We eliminate risk by guaranteeing the savings and eliminating misleading sales processes
- **No Credit Check Required** - No personal or corporate credit checks, qualify with a simple one page application for projects < \$150,000
