

## **KW Plastics**

#1 Sanders Road • Troy, Alabama 36079 • (334) 566-1563 • (800) 633-8744 Fax: (334) 566-1512 • www.kwplastics.com

June 1, 2012

To Whom It May Concern:

KW Plastics, Inc, in the manufacture of its products, does not intentionally add to its product, or included components, any heavy elements or other compounds in the forms identified in REACH or RoHS regulations.

Further, we do not believe that the feedstocks we collect for the purpose of manufacture contain any significant REACH- or RoHS-regulated elements or compounds, given the original use of the materials and the cleaning processes utilized in their manufacture at our facility. In addition, delivery of hazardous materials to KW Plastics, Inc., without notice is unlawful. However, currently, KW Plastics does not possess the necessary testing capability to examine its materials to specifically determine such content, except for the heavy elements lead, chromium, cadmium, and mercury, elements which we have determined that, if present, constitute less than 100 ppm total in our products manufactured at 1 Sanders Road, Troy, Alabama.
