- Metal fill and repair hourly rate (\$50/hr)
- Non visible internals (pricing varies)

All prices include disassembly and reassembly.

All non-visible/internal parts will **not** be coated to guarantee the function and operation of the firearm.

\$25 will be deducted from the full-cost if the firearm arrives disassembled. However, if any further disassembly is required after the firearm is dropped off, you will be charged the full price for disassembly.

All disassembled firearms must be accompanied by a complete typed and printed inventory parts list.

LFI will not guarantee the coating is damage-free nor guarantee the function of the firearm if you choose to assemble or disassemble yourself. In addition, LFI will not reassemble the firearm if you disassemble it.

All firearms that are dropped off to be cerakoted must have a magazine and a box of ammo with them for function testing.
