

THE MOST ADVANCED PAYMENTS SOLUTION IN HEALTHCARE

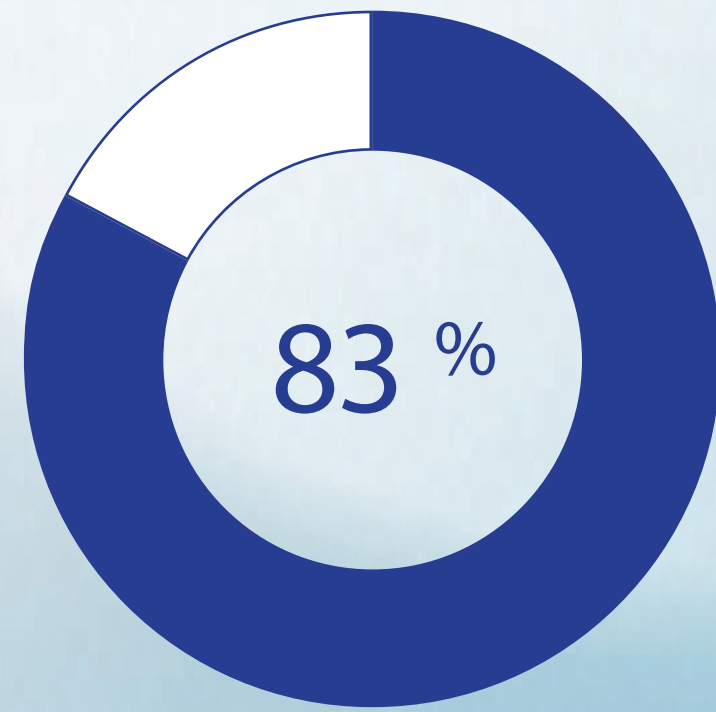

LIQUID PAYMENTS PATIENT-TO-PROVIDER TECHNOLOGY IS AUTOMATED, MOBILE, AND INTEGRATED FOR STREAMLINED PAYMENTS PROCESSING AND POSTING.

81% of patients pay by check, but they prefer electronic payment methods*

78% of providers cannot collect a \$1,000 patient balance in 30 days*

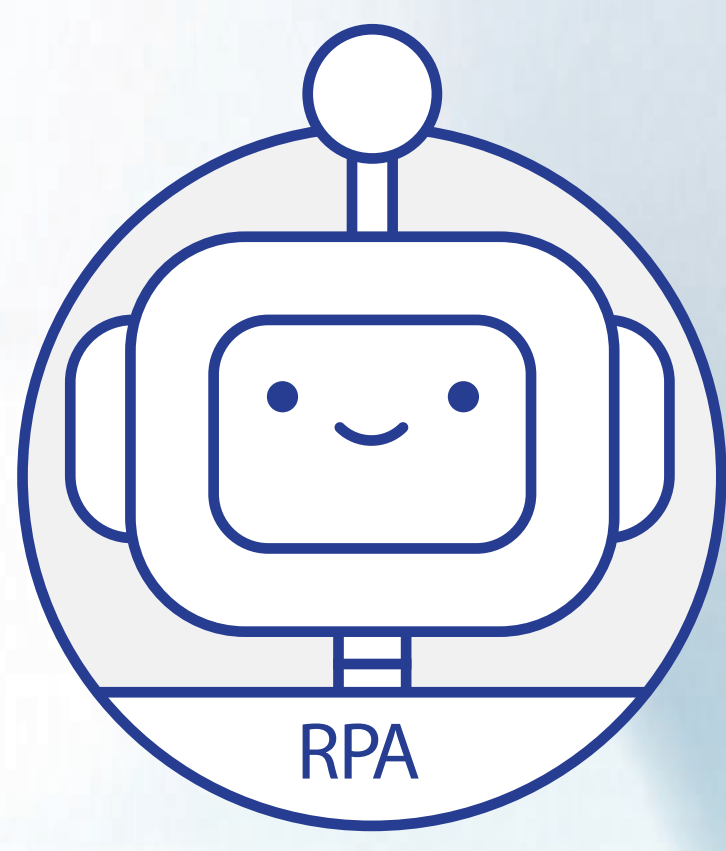

83% of smaller physician practices say top challenges are:
■ slow-paying, high-deductible patients**
■ communicating patient payment accountability

(*Trends in Healthcare Payments Tenth Annual Report, 2019 **Black Book 2017 Revenue Cycle Management Survey)

Liquid Payments (LQ) is simply the most effective and efficient way to collect and process patient payments. Feature-rich and completely contactless, the platform includes actionable mobile statements, sent via customizable text or email, enabling patients to pay immediately from any smart device.

By leveraging the embedded robotics, payments are automatically posted to the patient ledger. This technology can also be utilized to gather patient balances owed and facilitate an improved collections process. It's the fastest, safest way to collect payments with no disruption to existing systems.

AUTOMATED POST-INSURANCE COLLECTIONS

Liquid retrieves patient balance owed, then sends patient actionable mobile statement via SMS/email for mobile card entry. By leveraging Robotics Process Automation (RPA), the solution facilitates the automatic posting of payments into patient's account.

MOBILE PATIENT PAYS SMARTLY

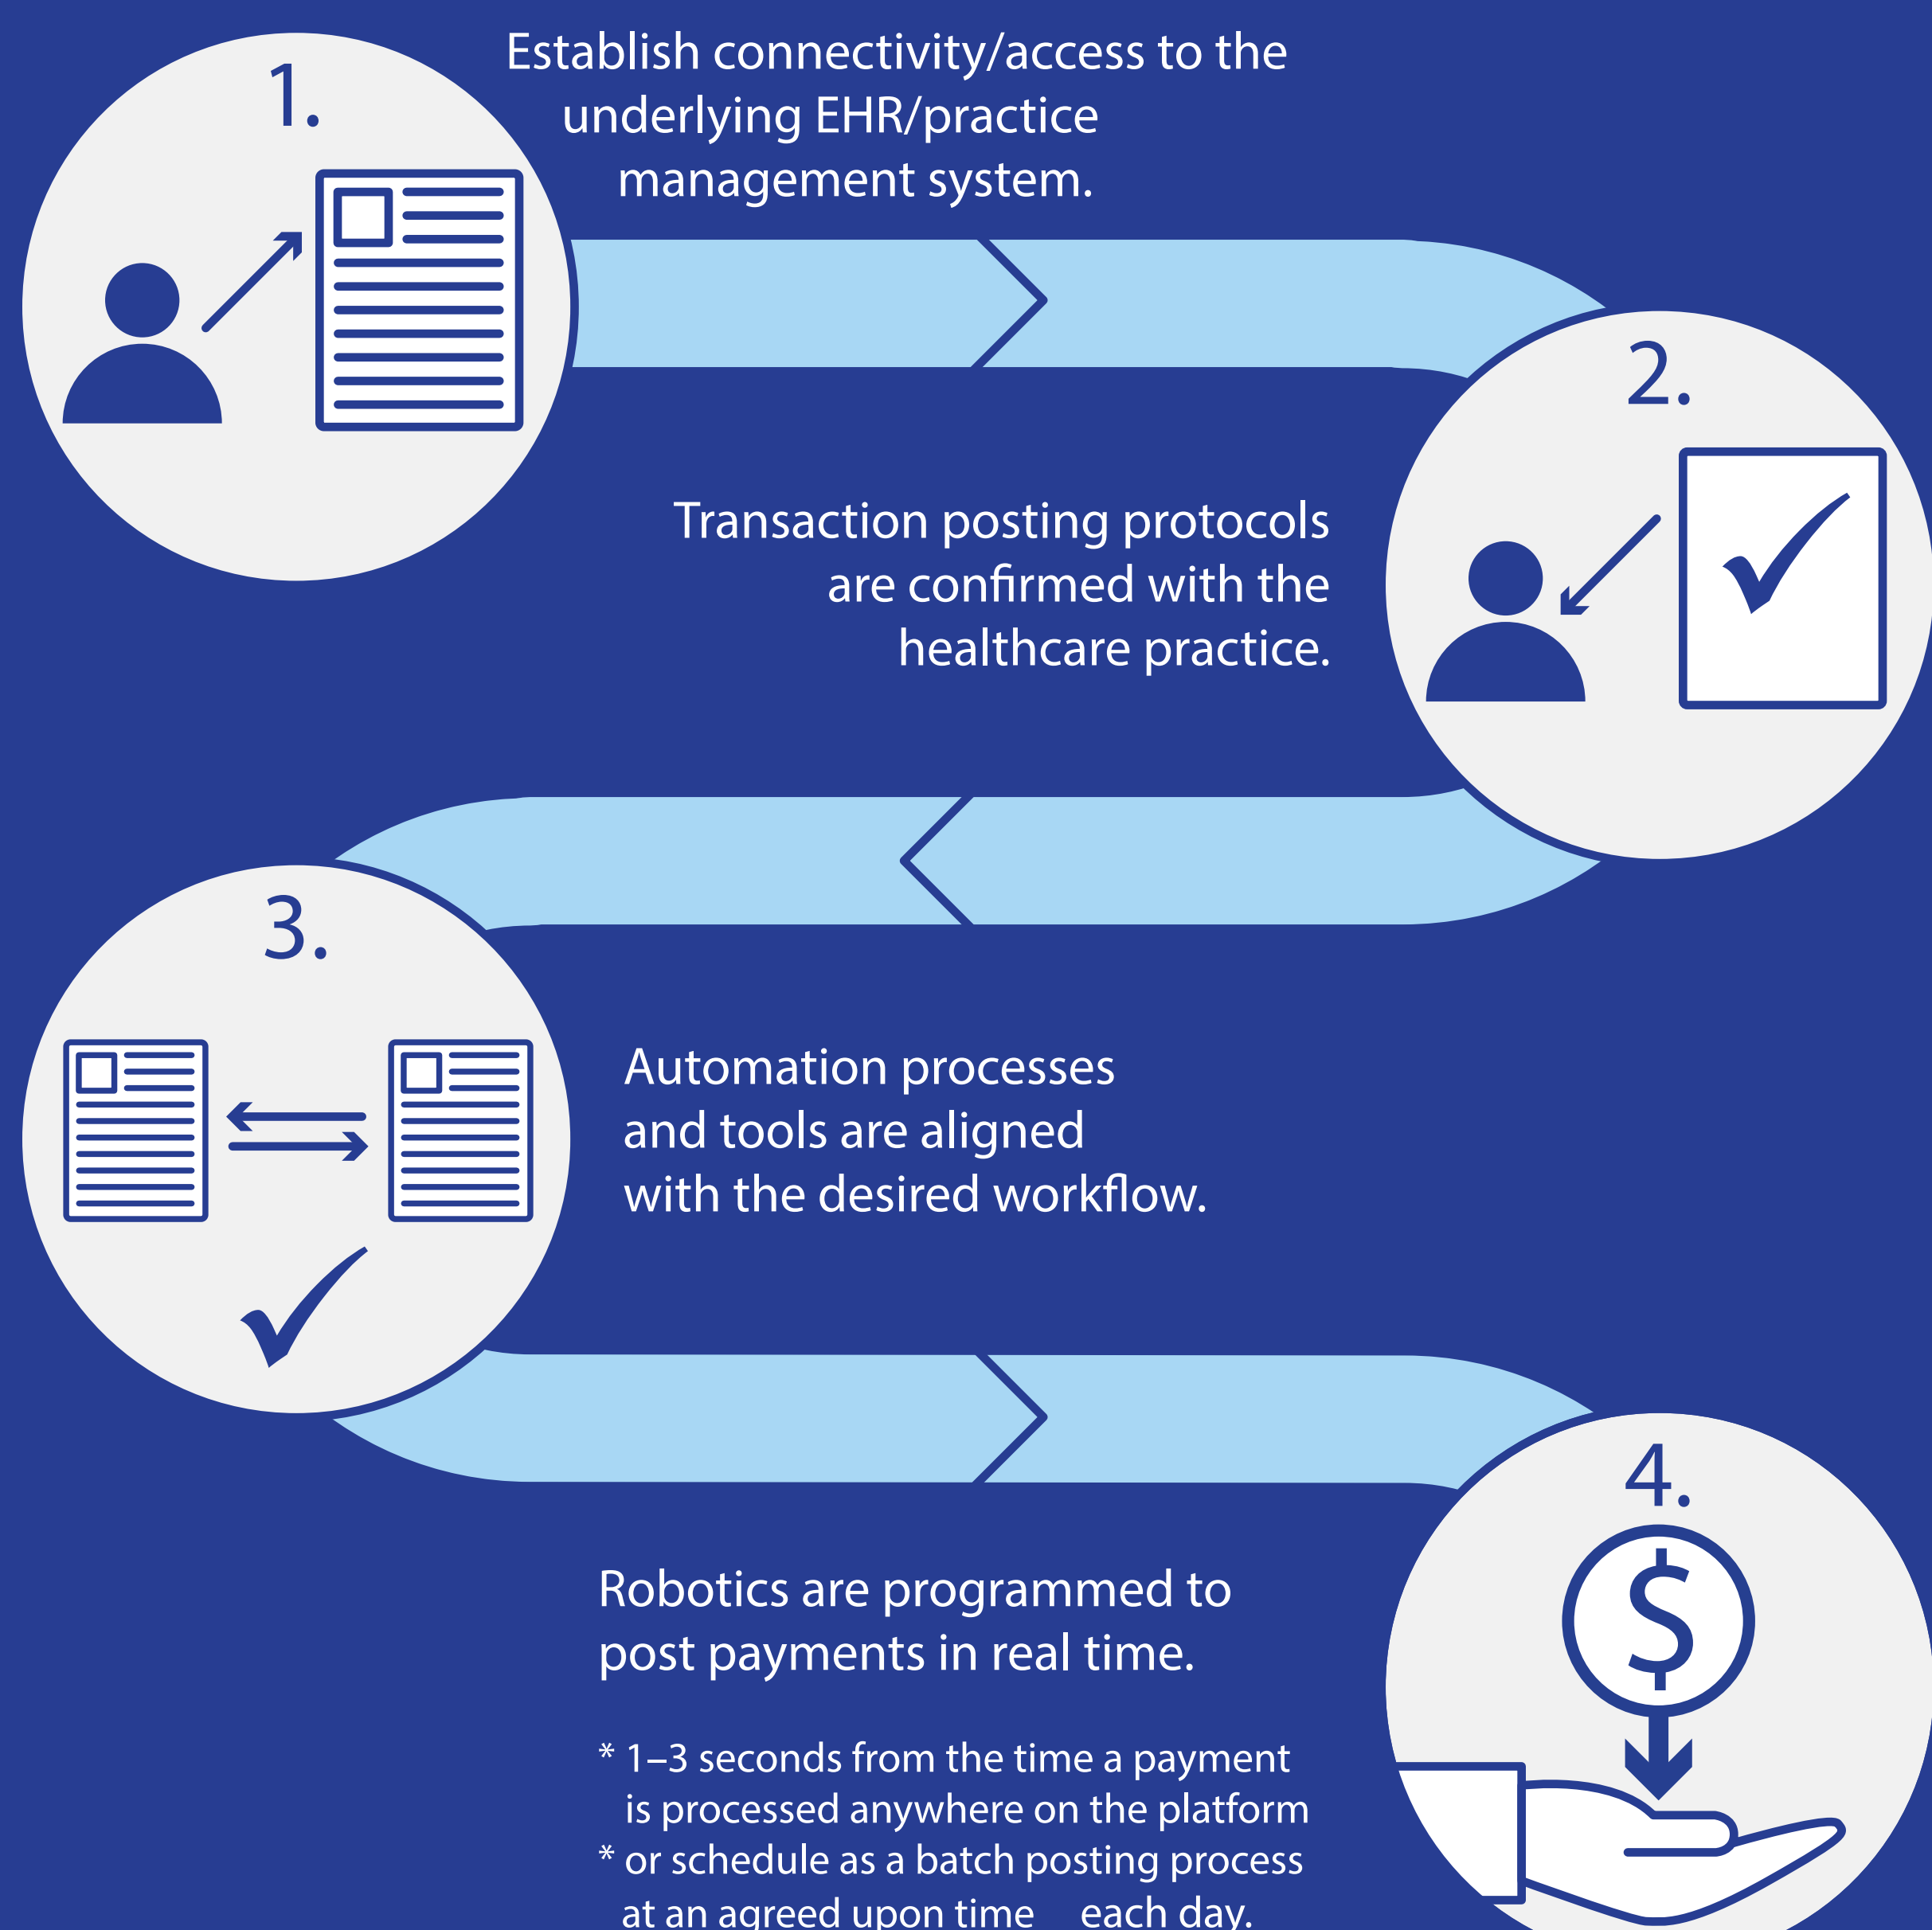

Using a remote smart device or in-office, wi-fi based, smart payment terminal, patient pays with speed and convenience.

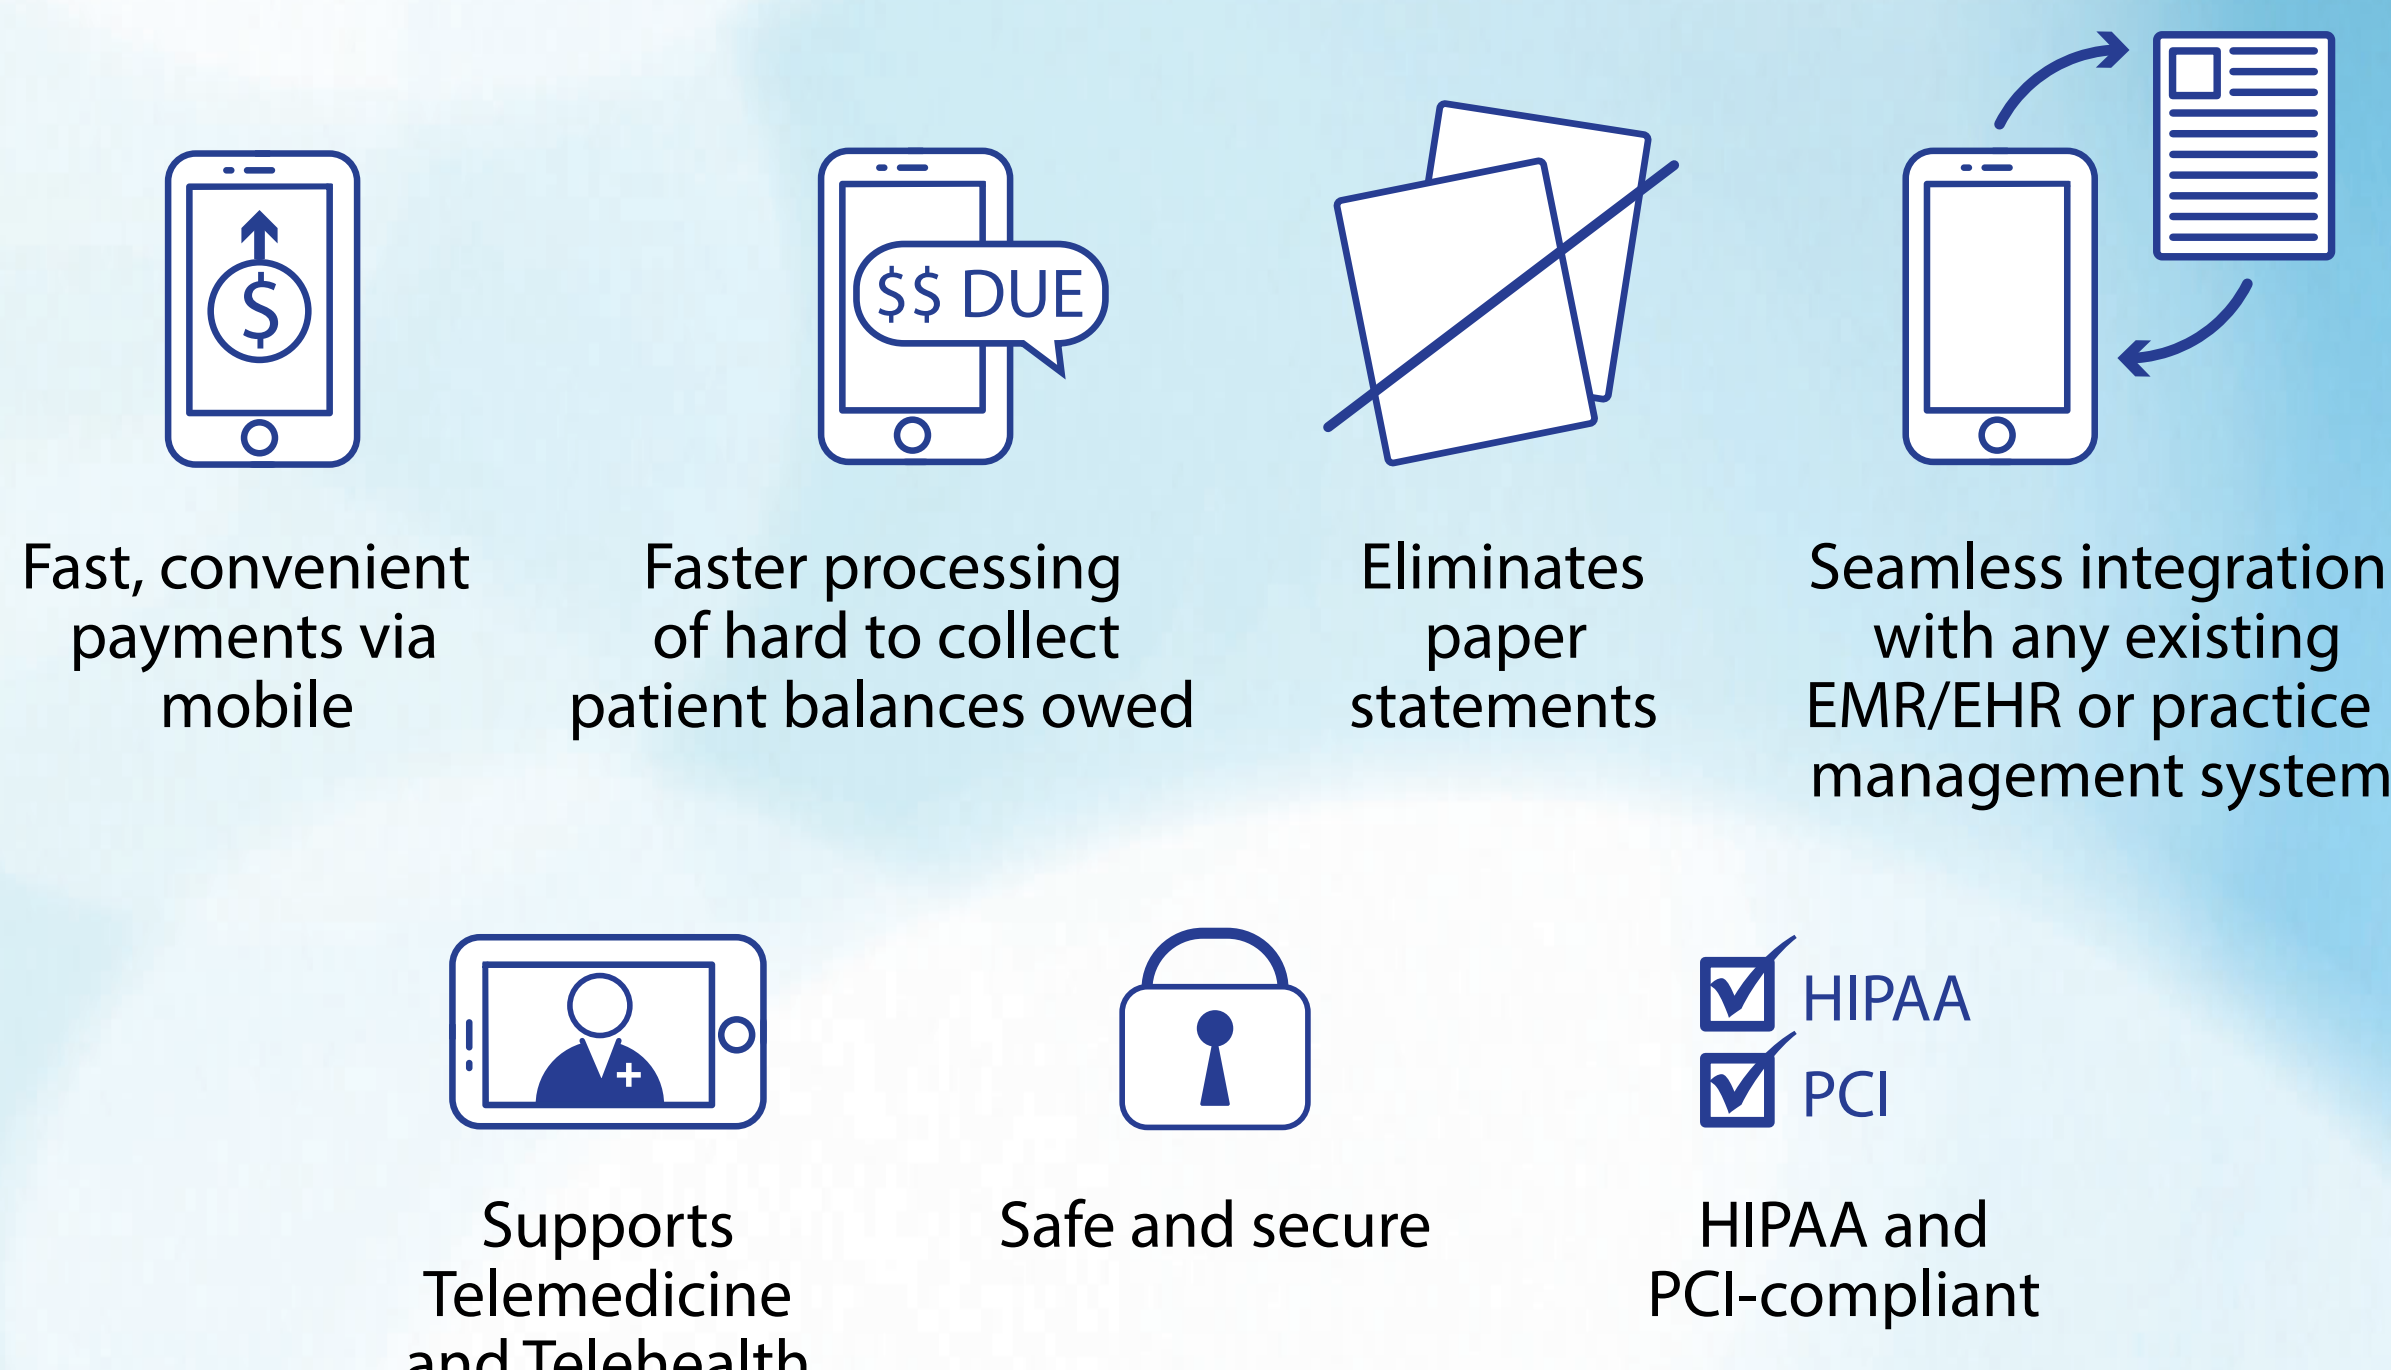

INTEGRATED SEAMLESS & ACCURATE INTEGRATION

RPA enables seamless and accurate integration of financial data to any EMR/EHR or practice management system, thus streamlining operations and reducing costs.
