

READ WHAT PATIENTS ARE SAYING

"I've been using this therapy to recover from a severe ischemic stroke which left my left side hemiplegic and hospitalized for 3 long months. I started my initial course of therapy 1 year post-stroke and then began to notice a decrease in my debilitating spasticity."

E. Geroni

"I don't necessarily understand all the science behind the E-HBOT Therapy. All I know for certain is I am feeling much better and most of my symptoms are gone!"

J. Muldune

CENTER ADDRESS:
10700 Medlock Bridge Road, Suite 103
Johns Creek, GA 30097

HOURS OF OPERATION:
Monday – Friday: 10am – 1pm & 3pm to 6pm
Saturday: by appointment only

Science & Technology Engineered
To Deliver **A Healthier You**

“The doctor of the future will give no medicine, but will interest his patients in the care of the human frame, in diet, and in the cause and prevention of disease.”

Thomas Edison

ISN'T IT INTERESTING THAT . . .

“We spend the first half of our lives compromising our health to gain wealth . . . and the second half of our lives spending our wealth to regain our health.”

Adequate blood flow is absolutely essential when it comes to enhancing the healing and recovery process. . .

Everyone wants to lead a happy, healthy life, but unfortunately oftentimes this isn't a realistic expectation for those suffering from chronic illness or injury. And many times, conventional medical treatments fail to deliver relief. Our combination therapy of both PEMF in conjunction with hyperbaric oxygen therapy (E-HBOT) provides an environment that allows the body to heal in an advanced and effective way.

Benefits of Enhanced Hyperbaric Oxygen THERAPY (E-HBOT)

- Enhances Blood Flow
- Reduces Stress
- Improves Concentration
- Increases Recovery Time
- Curbs infection
- Promotes growth of new capillaries
- Reduces Inflammation
- Stimulates Oxygenation
- Supports faster wound healing
- Reduces Pain
- Improves Sleep

Conditions Improved

- Autism & ADHD
- Stress & Depression
- Diabetes
- Arthritis
- Stroke
- Wound Care
- Traumatic Brain Injury
- Parkinson's
- PTSD
- Concussion
- Anti-Aging
- Sports Injury
- And Many Other's

DISCLAIMER: Although classified a Class II medical device by the FDA and deemed completely safe, certain medical conditions may be excluded from E-HBOT therapy due to contraindications. It is always recommended to seek the advise of your medical practitioner prior to beginning a regiment of E-HBOT therapy.
