WHAT IS HYPERBARIC PLUS™ OXYGEN THERAPY?

Discover the Healing Power of Oxygen

Hyperbaric Plus™ (HPOT) is the use of oxygen under pressure to help treat a variety of health conditions and diseases. Each cell in the body needs oxygen to preserve, repair and enhance cellular function.

What is Hyperbaric Plus™ Oxygen Therapy?

5 Most Commonly Asked Questions About Hyperbaric Plus™ Oxygen Therapy

1. Can Hyperbaric Plus™ Oxygen Therapy Help My Condition?

Absolutely we can help - There are in excess of 43,000 medical conditions known by medical science and an untold number of physical injury's that can happen. LyfeWell's Hyperbaric Plus Oxygen Therapy is clinically proven to benefit the vast majority of patients it serves.

2. Is Hyperbaric Plus™ Oxygen Therapy Covered By Insurance?

No – Hyperbaric Plus is not covered by insurance. However, our pricing is very affordable and in fact our most popular family plan is only \$45 per ninety-minute session.

3. How Do I Know Hyperbaric Plus™ Oxygen Therapy Is Working?

Although alternative healthcare therapies are not miracle cures, given enough time, they work. The individual patient is the absolute best way for us to determine the direct benefits. Keep in mind, everyone's body is different and as a result, respond differently and at a different pace.

4. How Much Does Hyperbaric Plus™ Oxygen Therapy Cost?

Our most popular treatment plan applies to the entire family and allows us to get our cost per ninety-minute session down to \$45 per session.

5. What Is The Common Protocol For Hyperbaric Plus™ Oxygen Therapy?

As we stated, every condition and patient is different and respond differently and it really depends of what the particular condition is we are treating and how fast the patient responds. However, a good rule of thumb is a protocol of at least one or two sessions per week is necessary to see maximum results.

HOW DOES HYPERBARIC PLUS™ OXYGEN THERAPY WORK?

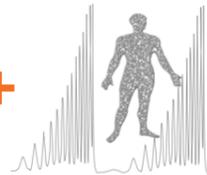

Oxygen

Pressure

Breathe

Impulse

= Advanced Healing Power

OXYGEN

The body's most essential nutrient, oxygen, makes up about 21% of the air we breathe. Infusing oxygen under pressure to the cellular level allows for optimal healing with very few risks or side effects.

PRESSURE

The term "hyperbaric" means using a gas at above normal pressure. Compared to breathing normal air at sea level. Pressurizing oxygen rich air drives the oxygen into our bloodstream to levels above normal.

BREATHE

Just Breathe - Relax and breathe normally during the 90 minute treatment session which are monitored by a team certified technician.

IMPULSE

Pulsed Electromagnetic Field Technology (PEMF) creates an energy field at a frequency equivalent to the earth's natural magnetic field. Which allows the generation of 35% more blood flow to the body's capillaries.

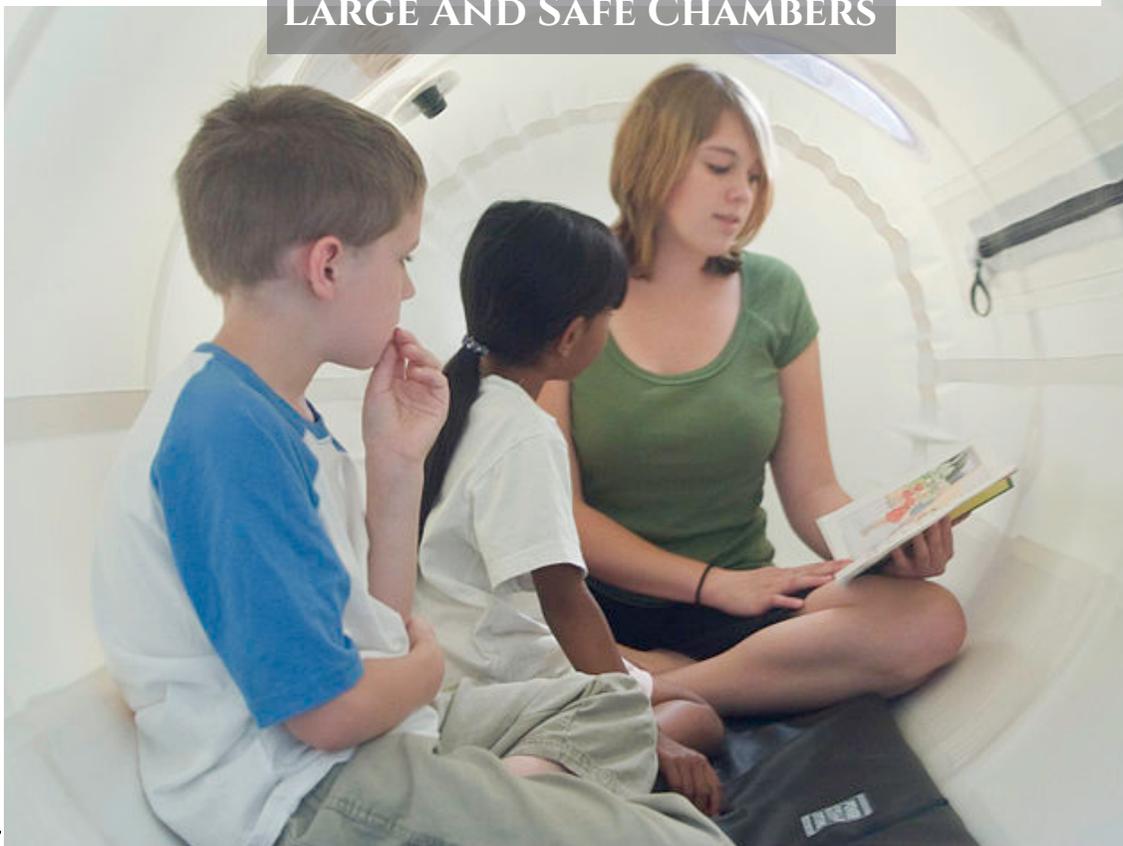

What is Hyperbaric Plus™ Oxygen Therapy?

THE BENEFITS OF HYPERBARIC PLUS™ CHAMBERS

- ✔ Increases the amount of oxygen carried in the blood stream, enabling more oxygen to dissolve deep into our tissues, lymphatics, and the cerebrospinal fluid surrounding the brain and spinal cord.
- ✔ Stimulates the growth of new blood vessels in the body, which increases circulation, allowing revitalized tissue to thrive even after the treatment protocol has been completed.
- ✔ Increases the production of superoxide dismutase, one of the body's natural antioxidants and free radical scavengers, which increases the ability of the body to fight disease and infection.
- ✔ Reduces inflammation and swelling, strengthens the immune system, stimulates the release of stem cells, and enhances mitochondrial function and regeneration.

LARGE AND SAFE CHAMBERS

HARD SHELL CHAMBERS MILD SHELL CHAMBERS **VS.**

On Label Conditions

Hospitals that provide hyperbaric therapy do so with hard chambers which is oftentimes referred to as “on label” conditions.

- The FDA has only approved 14 conditions for purposes of insurance reimbursement out of the total spectrum of 43,000!
- The use of hard chambers requires a high degree of safety precautions.
- Patients must wear 100% cotton clothing.
- Patients may not wear any form of jewelry.
- Patients cannot use any form of electronic devices during therapy.
- It is not uncommon for a hospital to charge between \$1,200 to as much as \$1,500 per one hour session.

Off Label Conditions

LyfeWell’s Hyperbaric Plus Chambers are Mild/Soft” oftentimes referred to as “off label.”

- LyfeWell’s therapy can benefit patients who have most of the known 43,000 medical conditions.
- Although LyfeWell therapy is not covered by insurance, our most popular plan is a family plan which allows us to offer our service for only \$45 per ninety-minute session.
- Our chambers are completely safe and patients may wear their street clothes during each session.
- Patients are free to use their electronic devices during each session.

What is Hyperbaric Plus™ Oxygen Therapy?

IS HYPERBARIC PLUS™ OXYGEN THERAPY RIGHT FOR ME?

Hyperbaric Plus™ Oxygen Therapy (HPOT) is a noninvasive treatment that can help in a variety of medical conditions either as a primary or complementary therapy. HPOT has very few risks or side effects. Hyperbaric Plus™ is helpful if you suffer from any condition that can be improved with additional blood flow and delivery of oxygen to vital organs and tissue.

Prior to starting treatment, all patients will have a consultation with a member of our trained and certified staff to discuss in detail their medical history and individual needs.
