A UNIQUE PROTOCOL FOR EVERY CLIENT

Our wide experience makes us sensitive to the fact that many organizations have their own special requirements for protecting the health and maintaining the productivity of their employees. For this reason, the Medics USA's Occupational Health team works with every corporate client to develop a unique protocol of service that will specify key issues like

- Which Medics USA offices will this firm use?
- What kind of testing or procedures will be required?
- Any special supplies needed?
- How and to whom are reports sent? How fast are they needed?
- Does the firm need its own special result or clearance forms?

This client-specific protocol is shared electronically with our entire staff to ensure a uniformly high level of service.
