

Consent & Release Agreement

This form is designed to give information needed to make an informed choice of whether or not to undergo a 3D Eyebrow semi-permanent microblading application. If you have any questions, please don't hesitate to ask.

Although 3D Eyebrow Microblading is effective in most cases, no guarantee can be made that a specific client will benefit from the procedure.

This is the process of inserting pigment into the basal layer of the epidermis. It is a form of tattooing, though semi-permanent.

All instruments that enter the skin or come into contact with bodily fluids are disposable and disposed of after each use. Cross contamination guidelines are strictly adhered to.

Generally, the results are excellent. However, a perfect result is not a realistic expectation. It is usual an advised to expect a Touch-Up after healing is completed.

Initially the color will appear more vibrant or darker compared to the end result. Usually within 5-7 days the color will fade 40-50%, soften and look more natural. The pigment is semi-permanent and will fade over time. Additional Touch-ups are likely needed within 6 months to 2 years.

Photography Release Consent

We would like to have your permission to use the photos for advertising and educational purposes such as portfolios, online and print ads, etc. Your consent is necessary regarding this, please circle and indicate with your signature if you give permission.

Yes, feel free to use them

No, please do not use them
