HOW TO ENJOY A QUIET HOME

Keep noise outside your home

- In addition to reducing air infiltration, the EnergyComplete™ System contributes up to 40% perceived reduction in outside noise vs. traditional spray foam systems**
- Enjoy fewer interruptions from noisy traffic and neighbors while you're trying to enjoy your new home

Control unwanted noise inside your home too

- Add QuietZone® Noise Control Solutions to reduce the unwanted noise that travels between rooms by up to 30%**
- Dampen everyday noises from conversations, appliances, TVs and plumbing transmitted through walls, ceilings and floors

Enjoy the freedom to do what you want, when you want, without bothering others

- Create an ideal atmosphere throughout your home

It's the right time to choose the benefits of noise control

- Get maximum enjoyment from your new home in the future by choosing the right noise control solutions today—act before the drywall goes up

* Owens Corning Test Report 90326 found that the EnergyComplete™ System with blown-in wall insulation reduces perceived outside noise through the wall by up to 40% compared to closed-cell spray foam and 20% compared to open-cell spray foam.

** The percentage noise reduction is calculated by correlating differences in sound levels to the ear's ability to perceive noise reduction across all frequency bands as measured in acoustics industry standard human listening studies.
