Inception date is April 1, 2016. Returns are reflected as total return. Returns are calculated net of fees, commissions, and expenses, and reflect the reinvestment of dividends. Index benchmark performance does not reflect the deduction of fees because indices are not managed investments. It is not possible to invest directly in an index. All investment involves risk, including risk of loss. Past performance does not assure future results, and achievement of investment objectives, including preservation of principal, cannot be guaranteed. Potential risks associated with the DRH Balanced Income strategy include, without limitation, market risk, liquidity risk, concentration risk, credit risk, reinvestment risk, and inflation risk.

DRH Balanced Income Composite Description: The composite represents an investment designed for long-term capital appreciation. The strategy allocates risk primarily across five U.S. equity factors, and U.S. Treasuries. The strategy also has the ability to take inverse positions and use cash to manage overall risk. The strategy is implemented primarily using exchange traded funds (ETFs) domiciled in the U.S.

Composite total returns are provided period to date since composite inception. Composite returns are presented net of fees. Benchmark total returns are presented according to composite inception date.

The S&P Target Risk Conservative Index is designed to measure the performance of conservative stock-bond allocations to fixed income, seeking to produce a current income stream and avoid excessive volatility of returns. Equities are included to protect long-term purchasing power.

The Morningstar Multi-Asset High Income Index seeks to deliver a high level of current income while maintaining long-term capital appreciation. The index consists of a comprehensive set of exchange traded funds (ETFs) in the iShares line-up that collectively target equity, fixed income and alternative asset class. This Index does not incorporate Environmental, Social, or Governance (ESG) criteria.

The U.S. Dollar is the currency used to express performance.
