DRH Income Composite Description: The composite represents an investment designed for current income. The strategy allocates risk primarily across high yield bonds, dividend paying stocks, REITs, investment grade corporate bonds, mortgage backed securities and preferred stocks. The strategy also has the ability to take short positions and use cash to help manage overall risk. The strategy is implemented primarily using exchange traded funds (ETFs) domiciled in the U.S.

Composite total returns are provided period to date since composite inception. Composite returns are presented net of fees. Benchmark total returns are presented according to composite inception date.

The Bloomberg US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency). Provided the necessary inclusion rules are met, US Aggregate eligible securities also contribute to the multi-currency Global Aggregate Index and the US Universal Index, which includes high yield and emerging markets debt.

The U.S. Dollar is the currency used to express performance.
