

Personal Lawn Care, Inc.

P.O. Box 9, Brunswick, TN 38014 • TN CH# 173

www.PersonalLawnCare.com

What did PLC do today?

Today I treated your bedding areas where possible:

- With pre-emergent weed control
- With post-emergent weed control
- For Bermuda grass in bedding areas

What to do Next

NEW!

Wait 24 hours or more, then thoroughly water for 15-20 minutes. Watering helps maximize the pre-emergent's effectiveness by moving it into the soil.

We are now accepting online payments!!

When can I expect to see results?

Broadleaf weeds will change color and start dying in 7-10 days. Bermuda grass & grassy weeds often show symptoms after approximately 7-10 days.

Visit our website for more information.

Now that we're offering credit card payments online, we will be phasing out our in house credit card processing... But don't worry, if you have already scheduled a payment with our office, we will still take care of that.

Remember: Call us when remulching. Pre-emergent needs to be applied **on top** of the new mulch for best results in controlling new weed germination.
