

## Service Note

Insect/Disease Control (ID3)

Technician Name: \_\_\_\_\_

Today, \_\_\_\_\_, we serviced your lawn for fungal infections or insect infestations. We use different products designed to prevent, suppress, or control different insect or disease issues found in your lawn.

\_\_\_\_\_ 1 - **Fungicide:** To prevent or treat zoysia patch and other fungi that are affecting lawns in our area. Since fungicides are not always a “one-and-done” application, when treating significant outbreaks or if conditions favorable to fungal infection persist, additional applications may be required.

\_\_\_\_\_ 2 – **Surface Insecticide:** For control of surface insects and mites. Whether a nuisance or causing significant damage to your lawn, these insects can be managed.

\_\_\_\_\_ 3 – **Soil Insecticide:** Designed to control soil insects that feed on turf. These pests cause damage to lawns by eating the roots, stems, or leaves of the grass, eventually weakening or killing it. If moles are an issue in your lawn, treating for grubs may be one step in mole control, but it will not eliminate them completely. For more information on mole control, check out our blog: [www.personallawncare.com/blog/are-your-moles-undercontrol/](http://www.personallawncare.com/blog/are-your-moles-undercontrol/).

### What To Do Next

- Keep pets and people off of sprayed areas until dry – usually about 1 hour.
- Wait 24-72 hours and water 20-30 minutes in each area if it does not rain. Watering moves the insecticides and fungicides into the soil where they are most effective.
- The first time you mow after the ID3 application, mulch the clippings – DO NOT BAG. If it has not rained, be sure to water **before** you mow! Then, you are free to mow at any time.
- Let us know if symptoms persist or worsen.

### Client Portal

View your account and make payments online. Just visit our website and click “My Account.” To create an account, you will need your Client ID (found on your invoice) or call our office for assistance.

### Missed Appointments

A \$35 trip charge may be added to your application if we established a date/time for service and are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.
