

Service Note

Lime Application

Technician Name: _____

Today, _____, we serviced your lawn with the following Lime application(s):

_____ **Pelletized Limestone (L1):** Lime neutralizes acids in the soil and adds calcium and magnesium, which are important for healthy turf growth. Liming turf areas also improves the effectiveness of many weed control products, reduces stress on the turf, and promotes greater utilization of fertilizers by increasing the availability of nutrients.

_____ **Touchup Weed Control**—for emerged weeds.

What To Do Next

- Keep pets and people off of treated areas until dry – usually about 1 hour.
- **If lawn work is not scheduled, watering is not necessary. Just wait until after the next rainfall.**
- For best results, wait 24 hours, then if it has not rained, water 15 to 30-minutes in each area. Watering moves the limestone onto the soil surface.
- Mow or rake as needed. If it hasn't rained, BE SURE to water before winter cleanup! If watering is not possible, please MULCH clippings.
- REMEMBER: Lawns need about one inch of rainfall, or equivalent watering, per week. Please see our website for more info.
- Some discoloration may be seen from weed touchups. This is temporary and typically fades by the time of the second mowing.

Client Portal

View your account and make payments online. Just visit our website and click "My Account." To create an account, you will need your Client ID (found on your invoice) or call our office for assistance.

Missed Appointments

A \$35 trip charge may be added to your application if we established a date/time for service and are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.

Services Offered

Fertilization	Crape Myrtle Bark Scale Control
