

Service Note

Round 2 Application

Technician Name: _____

Today, _____, we serviced your lawn with the following Round 2 application(s):

_____ **Second Weed Control:** This application controls any remaining broadleaf or grassy weeds that may be present and extends the pre-emergent barrier against summertime weeds. Application includes nutgrass control and spot treatment for other difficult to control weeds.

_____ **Sprayable Fertilization:** This liquid fertilizer encourages strong growth to help your lawn thrive through the summer and promotes that healthy green color we all love into the fall without leaving visible pellets in your lawn.

_____ **Granular Fertilization:** This fertilizer encourages strong growth to help your lawn thrive through the summer and promotes that healthy green color we all love into the fall.

What To Do Next

- Keep pets and people off of sprayed areas until dry – usually 1 hour or less.
- Wait 24-72 hours and water, if it has not rained, up to 30-minutes in each area. Watering moves the products into the soil where they are most effective.
- Mow 5-10 days after application. If it has not rained, be sure to water **before** you mow! If watering is not possible, mulch the clippings.
- Full weed control effectiveness may take up to 21 days.

Client Portal

View your account and make payments online. Just visit our website and click “My Account.” To create an account, you will need your Client ID (found on your invoice) or call our office for assistance.

Missed Appointments

A \$35 trip charge may be added to your application if we established a date/time for service and are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.

Services Offered

Fertilization	Crape Myrtle Bark Scale Control
Fungus Control	Flower Beds Weed Control
Insect Control	Fescue Care and Fescue Overseeding
