

## Service Note

**Beds**

**Technician Name:** \_\_\_\_\_

Today, \_\_\_\_\_, I treated your bedding areas where possible:

\_\_\_\_\_ With pre-emergent weed control

\_\_\_\_\_ With post-emergent weed control

\_\_\_\_\_ For Bermuda grass in bedding areas

### What To Do Next

- Wait 24 hours or more, then thoroughly water for 15 to 20 minutes. Watering helps maximize the pre-emergent's effectiveness by moving it into the soil.
- When can I expect to see results? Broadleaf weeds will change color and start dying in 7-10 days. Bermuda grass and grassy weeds often show symptoms after approximately 7-10 days.
- REMEMBER: Call us when re-mulching. Pre-emergent needs to be applied on top of the new mulch for best results in controlling new weed germination.

### Client Portal

View your account and make payments online. Just visit our website and click "My Account." To create an account, you will need your Client ID (found on your invoice) or call our office for assistance.

### Missed Appointments

A \$35 trip charge may be added to your application if we established a date/time for service and are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.

### Services Offered

Fertilization	Crape Myrtle Bark Scale Control
Fungus Control	Flower Beds Weed Control
Insect Control	Fescue Care and Fescue Overseeding
Weed Control	Lime Application
Soil Analysis	Shrub Care

### Touchup Policy

Weed control applications are warranted for 30-days after service.

Touch ups between applications are provided (if needed) at no charge for clients who have selected the PLC Preferred Service Plan.

For clients with reduced service plans, touch ups requested after the 30-day warranty period will be available, but may be charged for the application.
