

Service Note

Round 4 Application

Technician Name: _____

Today, _____, we serviced your lawn with the following Round 4 application(s):

_____ **Winterizer Fertilization (F3):** Our third fertilization of the year will strengthen the root system and help your lawn remain healthy as it goes into dormancy. A healthy turf survives harsh winters better and will green-up earlier and stronger next spring. Application also includes touch up for emerged weeds.

Please note: Light to moderate leaf coverage is NOT a problem and does not reduce the effectiveness of today's service. Wait until after watering to rake or mow and bag the leaves. Mulching leaves (not side discharge) with a lawnmower may be done at any time and does not require watering.

What To Do Next

- Keep pets and people off of treated areas until dry – usually 1 hour.
- Water 15 to 30-minutes in each area if rainfall is not forecast within the next 24 hours. Watering moves the fertilizer into the soil.
- Mow as needed. If bagging the clippings and no rain has fallen, BE SURE you water before you mow! Don't want to water? Then please MULCH leaves and clippings.
- REMEMBER: Lawns need about one inch of rainfall, or equivalent watering, per week. Please see our website for more info.
- Some discoloration may be seen from weed touchups. This is temporary and typically fades by the time of the second mowing.

Client Portal

View your account and make payments online. Just visit our website and click "My Account." To create an account, you will need your Client ID (found on your invoice) or call our office for assistance.

Missed Appointments

A \$35 trip charge may be added to your application if we established a date/time for service and are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.

Services Offered

Fertilization	Crape Myrtle Bark Scale Control
Fungus Control	Flower Beds Weed Control
Insect Control	Fescue Care and Fescue Overseeding
Weed Control	Lime Application
