

Prepare For Your Move

Moving is less of a chore when you break down the tasks into to-do lists. Quality Services Moving is here to help you with our guide to make your upcoming relocation more manageable.

- It's never too early to start making plans with your moving company. Start by receiving a free in-home estimate from one of our Certified Moving Consultants.
- If you are moving to a new area, research banks, doctors, and schools. Gather all the proper paperwork you need to set up new accounts.
- If you plan on self-packing begin packing items that aren't used frequently. Seasonal items, rarely used gadgets, and items stored in the attic or basement are a good place to start.
- Fill out an official change-of-address form with the U.S. Post Office.
- Cancel all newspapers, home deliveries and set up delivery in your new neighborhood.
- Consult your list of businesses and services and make address changes on all accounts.
- Put in time-off at your job for the days surrounding your move and schedule a babysitter if needed.
- Confirm that all paperwork from Quality Services Moving has been signed and returned.
- If you are moving major appliances, make sure that they're cleaned, unplugged, and ready to go. Freezers need to be defrosted and you may need a professional to disconnect gas lines on particular appliances.
- Dispose of all flammable items that can't be transported (paint, chemicals, aerosol cans).
- Hire a cleaning company to come in and do a quick clean after the movers leave or schedule a day that you will come back and make sure that everything is clean and in place for the new owners.
- Check in with **Quality Services Moving** one last time and confirm that everyone is on the same page.
