

# SWING BED PROGRAM

Bridging the gap between hospital and home

Safe, skilled care for those not yet able to function independently

## Two Options

Swing Bed and Intermediate care offer wellness services to those exiting Acute hospital stays. Often, Swing Bed patients require IV therapy or rehab from hip, knee or other surgeries. Intermediate patients are residents who seek a variety of care and support in the health center setting.

### Swing Bed

Opportunity for final rehabilitation and discharge preparation

Patient admitted by RCHC or other medical staff and accepted dependent upon the facility's ability to meet patient needs.

Services include: medical, nursing, Physical Therapy, dietary, and others as needed

### Intermediate

Provides short or long term support in a comfortable setting

Increases patient independence

Admissions are private pay, with some Medicare Part B benefits

Services available: daily meals, Physical Therapy, Cardiac Wellness, social activities & recreation
