

**FOR IMMEDIATE RELEASE**

**PHYSICIAN ASSISTANTS, KYLE AND BARB HERSPRING TO MOVE IN JUNE.**

**ATWOOD, KANSAS (February 26, 2019)** Kyle and Barb Herspring, physician assistants at Rawlins County Health Center, will be leaving the Atwood community and relocating to Wichita sometime in June 2019. “We have greatly enjoyed our time in Atwood and at Rawlins County Health Center. It was not an easy decision. Rawlins County Health Center has been great to work with, but we have decided it is time that we move to a town that has more homeschooling communities, amenities that are important to our family, and an airport to allow my parents to visit more often” Kyle stated. “We have made many great friends and are proud to have been part of Rawlins County. We will greatly miss all of our patients and co-workers and appreciate the continued support of the hospital and community.”

Since arriving in Rawlins County at the end of 2013, the Herspring’s have been very active in their church, raising their children, and helping Rawlins County Health Center grow to a thriving healthcare facility. Kyle was key in starting the wound care clinic and continues to make that clinic a success. “We thank both Kyle and Barb for helping to build a great system of care for the community, and understand the value and appreciate the need for the Herspring’s to focus on the importance of family first,” remarked Ron Robinson, CEO. Both providers will be missed, and Ron stated that administration will work closely with Kyle and Barb Herspring, Dr. Brewster Kellogg, Jason Kearns, Charity Wright, our sister hospital in Goodland and Centura Health to provide continued coverage and increase sustainability at the health center. “We leave confident that Ron and the leadership team at Rawlins County Health Center are committed to continuing to provide high quality healthcare to the region,” added Kyle.
