

Steel Edge Doors Contain Extra Features...

Polyurethane Insulation:

Doors are fully insulated with an inner core of environmentally friendly polyurethane foam. Provides energy efficiency and reduces noise.

Perimeter Weatherstrip:

A continuous strip of magnetic weatherstrip seals the top and side of the door with the frame. A foam compression weatherstrip completes the seal on the hinge side. Preventing air infiltration around the door.

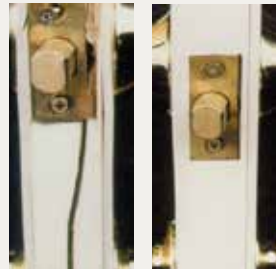

Steel Security Plate:

Steel security plate reinforces the jamb and deadbolt area for added security. Helps prevent forced entry.

Composite Reinforced Lock Preparation:

Provides rigid base for installation of hardware. Reinforces lock block area for added security. Permits a more uniform foam fill for better insulation, unlike wood lock blocks.

Steel Edge Construction:

A full steel edge adds greater strength and durability. There are no wood edges to rot, warp, split or bow. Steel edge doors maximize the security of your home. All steel edge doors have a 90-minute fire rating, meeting the requirements of ASTM E-152.

Low Maintenance PF Composite:

Poly-Fiber door frame is moisture, rot and insect resistant. Will never warp, splinter or rot like traditional wood. Optional finishes available.

Door Light and Frame:

All tempered door lights, clear or decorative are warranted for a lifetime. The frame will not warp from high heat. The insulated tempered glass produces the best energy efficiency.

Adjustable Hinge:

A standard on all 22 gauge steel edge doors. The unique adjustable hinge plate system offers built-in advantages unmatched in the industry. The adjustable hinge plate makes it possible to adjust the door up or down, in or out. Helps maintain door alignment and proper weather seal. **All that's needed is a screwdriver!**

Door Bottom Seal:

The door bottom weatherstrip slides off and on for easy replacement and forms a weather-tight seal to the threshold.

*90-Minute Fire Rating

Craftsman Doors

The two panel Craftsman Door with clear insulated tempered glass is available in 1, 3, and 6 Simulated Divided Lights. Craftsman Doors are a heavy duty 22-gauge steel face sheets with an all steel edge perimeter. The Craftsman Door includes an adjustable hinge to help maintain a weather - tight seal. The low maintenance Poly Fiber Composite frame; standard on all steel doors, is moisture, rot and insect resistant. Strength, security & durability are built into every door to last a lifetime. Optional Dental shelf is available for Craftsman two-panel doors..

A great addition to any cottage style decor! The RDR 3 is a solid panel door with High Definition panels and planking. This 22ga steel door is 30% thicker than your 24ga steel door. Adjustable hinges makes a weather tight seal. Add a touch of elegance with the RDR 3L when you choose a decorative glass. This entry door will add value, security and energy savings to your home.

Rustic Smooth Steel

The Rustic Smooth Steel door provides the same heavy 22-gauge steel construction as the Craftsman doors. The design features a 2-Panel Camber Top with High Definition Planks. The Rustic door is engineered to meet design needs of Southwest, Spanish or Mediterranean style homes. Fullview sidelights with Wrought Iron or Black Patina decorative glass will compliment your home's décor (see decorative glass brochure for details).
