Resolution Frustration Month!

By Mark Hagberg, MD

So it's been one month now that you made that new year's resolution to get your body more in shape. For some people, it's going well and you are already seeing improvements in the contour of your body. But if you, like hundreds of thousands of Americans, are feeling frustrated this month due to lack of results with your resolution, caused by stubborn pockets of unwanted fat, I encourage you to try something different this year... book a free consult at Skin Rejuvenation Clinic for ProLipo laser liposuction. This year could be the year that you stop the frustration and finally see a change in your body. Virtually overnight.

You may have heard us talk about ProLipo laser-assisted liposuction before and thought, "that's not for me" but ProLipo is a safe and effective procedure for many body types. No matter if you are a size 2 or a size 22, you may have stubborn areas of fat that seem out of proportion to the rest

SkinMedica GlyPro

At SRC, one of our primary focuses is to introduce your skin to the best and most effective products to create healthy, happy skin. Which is why we are proud to introduce our new **GlyPro Antioxidant line** will be the perfect answer to exfoliating and correcting dull, pigmented or aging skin while also staying hydrated.

Glycolic acid is a crucial performer in the skincare world. It is derived from natural sugar cane and creates major change in the way of
