

FASTFILL™ 54

SEMI-AUTOMATED VIAL FILLING

SIMPLE, RELIABLE, ACCURATE, SAFE AND COMPACT —THE FASTFILL 54 EASILY FITS INTO ANY PHARMACY LAYOUT AND BUDGET

Safe and Accurate

FastFill 54 is a semi-automated vial filling device with 54 locking canisters that can only be removed through software access. Drugs are secure until they are dispensed. Along with superior counting technology, barcode verification, locking canister system and direct fill, the FastFill 54 sets the standard for safety.

Compact System

At five square feet, the FastFill 54 is the most compact semi-automatic vial filler of its kind. Despite its large volume (900cc) canisters, the FastFill 54 has the most drug cells per square foot.

Expandable

The FastFill 54 is modular and can be expanded to daisy-chain up to five units together. It is designed to allow flexible layout options to benefit the smaller or growing pharmacies.

Smart Choice

The FastFill 54 is slim, economical, and efficient. It is the ideal entry level solution. It costs much less than other types of automation, has fewer components, and is simple to use and maintain.

Specifications
