

# Steri-Clean Pest Control

## CLIENT RESPONSIBILITY ROACH PREPARATION CHECKLIST

Date: \_\_\_\_\_ Time: \_\_\_\_\_

### SANITATION

This is one of the most important steps in eliminating any roach infestation.

- Remove all items out of kitchen and bathroom cabinets as well as all items on top of the cabinets.
- Keep the kitchen, food storage, dining room and bathroom, ect.. area clean. Pick up crumbs and spills promptly and pay special attention to food debris behind the stove, refrigerator, dishwasher, sink, bar and storage area. \*\*\*\*\**Important*
- Eliminate all Fats, oils, grease (F.O.G.) build up areas. Pay special attention to the wall, behind stove, stove tops and crack and crevices in the kitchen. Roaches love grease and cannot be penetrated by chemicals. \*\*\*\*\* *Important*
- Eliminate all sitting water and repair any leaking faucets or drains.
- Empty trash regularly and keep trash away from building.
- Pull all items 2 feet away from the wall so the technician can treat the interior foundation.

### Important Notes

- PETS – cover fish tank with plastic wrap, unplug air pumps and cover with a towel or blanket. DOGS, TURTLES, HAMSTERS, BIRDS must be removed from the unit during treatment. Put cats in the bedroom, close door and seal with a towel. Cover and store all pet food and dishes.
  - Remain away from the premise for 2 hours after service.
  - Small children, persons with respiratory problems and/or allergies must vacate the premises during the service treatment. Please plan to leave for 3-4 hours. If you are PREGNANT or use OXYGEN please call the office before service.
