**Skin Care As Individual As You**

Introducing S.A.M  
Skin Analyzer Magnifier  
The Latest in Skin Care Technology

## WHAT IS S.A.M.?

A sophisticated, mobile tool that uses a fluorescent black light with a magnifying mirror for analyzing the skin.

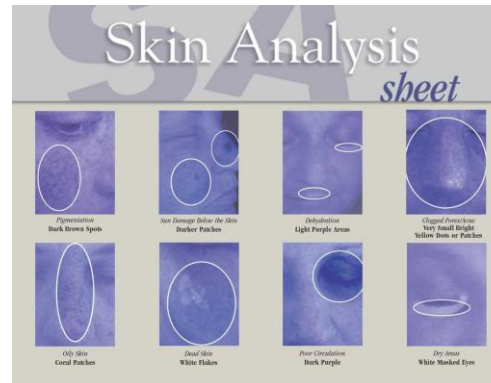

Inside SAM

S.A.M. causes the skin to look fluorescent (resembling a photo negative) with various conditions of the skin appearing to radiate various colors.

## WHAT IS THE PURPOSE OF S.A.M.?

It aids in the discovery of blemishes, congestion under the skin, dehydration and degeneration of the skin that is not readily visible to the naked eye. It also aids in the treatment of acne, wrinkles and fine lines, dark circles under the eyes and premature aging.

Through a magnifying mirror, S.A.M. also enables you to see your own skin problems first hand. You can also see the progress of improvement with the help of the proper skin care products.

## HOW DOES S.A.M. WORK FOR YOU?

S.A.M. aids in...

- ✓ Educating you on skin problems and skin care solutions.
- ✓ Indicating your individual needs
- ✓ Stimulating a commitment to using skin care products consistently and faithfully

SOUNDS GREAT!
