

To whom it may concern,

Here at Freedom Service Dogs, we bring dogs in from shelters throughout Colorado to undergo training to be working dogs. In many cases, these dogs come to us with kennel cough. Recently we had an opportunity to test an air treatment device in collaboration with a local company named UVAIRx, Inc. During the test period, we noticed a reduction in the spread of kennel cough to other dogs in the isolation wards.

Sincerely,

Carrie Godwin
