

ELECTRICAL COMPONENTS

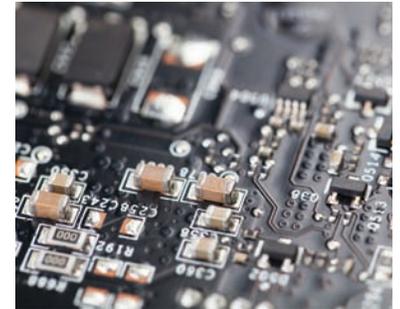

Customers in the industrial, automotive, aftermarket and retail markets depend on us as a leader in manufacturing high-quality, reliable parts at a reasonable cost. With multiple manufacturers, we can match any project to the most suitable supplier based on your exact specifications. We also have the flexibility and scalability to meet your needs now as well as in the future.

Printed Circuit Boards

You have a design, and we have the manufacturing expertise to bring it to life. We collaborate with you throughout the life of your project to match the appropriate method of production to your design to ensure success. We listen to your concerns and use our expertise to provide input when needed to identify pitfalls and make recommendations.

We have the capability to manufacture several types of printed circuit boards, including:

- Populated or non-populated
- Multilayer
- Single or dual side
- Surface mount
- Through component
- Automotive

Wiring Harnesses

Wiring harnesses can decrease the time it takes to install groups of electrical wires and minimize the risk of shorts and the effects from vibrations, abrasions and moisture. We have the full customization capability to meet the specific needs of your project.

Electrical Assemblies

The intricate assembly of precision electrical components requires reliability and expertise — two words that define UGS. Whether we manufacture the printed circuit boards and wiring harnesses then assemble them or simply provide the assembly, we ensure they meet your specifications and are in compliance with best practices — every time.

Certifications and Standards

We manufacture every electrical component to meet customers' and/or industry standards as specified. We are ISO 9001:2000 certified and meet UL, ETL and RoHS certification requirements.

It is our promise to provide you with the products you expect on time, in spec and on budget. We will deliver as promised to your complete satisfaction.

We invite you to learn more about UGS and how we can contribute to your continued success and increased profitability.
