EXTERIOR SOLAR SHADES

The Drop-Roll awning can protect your verandah or deck from the sun as well as provide some privacy, adding value to your home and your business.

- Straight drop-roll awnings are perfect for enclosing a patio or deck.
- Roll vertically up and down.
- Can be secured with either stainless steel dog clips, bungys or straps.
- Keep the sun off the house and lower the stain on air conditioners.
- Can be operated by either a cord, gearbox, spring loaded or Somfy Motorization for full operation at a remote control.
- Smart Canvas offers a huge fabric range, including a block out European manufactured acrylic canvas and sunscreen material.
- Protect your verandah or patio from wind and rain, while enjoying the view using clear quality PVC.
- Protect your house from the harsh California sun with a custom made roll up Smart Canvas awning.

## President Exterior Solar Shade

President Solar Shade with Mermet or Ferrari fabric offers customers with excellent solar protection and glare reduction while maintaining an excellent level of visibility.

President comes complete with stylish extruded aluminum housing box, your choice of siderails, side cables or free hanging hembar. President span distances of up to 12' without fabric gaps and up to 24' as a coupled unit.

Motorized President comes standard with switch operated motor and can be upgraded with remote control or can be integrated to operate with various automation systems and accessories.

Optional Stand Off mount unit is available at extra cost where fabric roll is reversed so that it comes off the front of the box rather than off the back. Stand-Off mount is ideal in situations where there are obstructions such as door knobs, faucets or large window moldings.

Vertical welding adds reinforcing material to the screen's edges which increases strength, stability and minimizes fraying.

### Product Coverage:

Horizontal Widths:

36 to 144 inches (3' to 12')

Projections:

36 to 168 inches (3' to 14')

Roller Tube:

63 mm extruded aluminum slot tube of 6061-T6 alloy, mill finish.

### Mode of Operation:

Tubular Motor, Hand Crank and Pull Tape

### Hardware Colors:

White, Sand, Bronze and Ivory

Retractable solar screens have long been utilized in European countries to help reduce energy cost while maintaining comfortable interior temperatures. By controlling the amount of sunlight that penetrates your windows. They prevent solar energy from gaining access to your home reducing air conditioning loads up to 50%. A research group studied the energy savings of exterior and interior shading systems and found dramatic improvement in energy blockage of exterior systems with their finding summarized.
