

Shade Sails cover all of your outdoor areas: driveways, patios, decks, swimming pools, playgrounds and entertainment spaces. This product will enhance your outdoor life style and provide comfort from the sun's heat and protection from UV rays.

## SUN SHADE SAIL PANELS

Whether you are looking for a Shade Sail to shade your yard, pool, BBQ, entertainment area, playground or carport, we can craft it.

Van Nuys Awning can design a Shade Sails that will not only protect but enhance the look and value of your property.

If you want to protect yourself and your property from harmful sunrays - whether it be a playground, your backyard, or your place of business - then a shade sail is a perfect investment.

### Shade Sails Lower Temperature

Hot air rises out the top between the knitted yarns of High Density Polyethylene. This draws outside air into the structure from the sides, which creates continuous air movement. That's why they reduce ambient air temperature up to 20 degrees. By contrast, hardened roofing materials (i.e. metal, wood, plastic, tile, stone, etc.) and conventional shade fabrics trap heat inside the structure.

### Design Ideas For Your Shade Solution

Shade sails are a new and exciting shading solution. Unlike conventional awnings and shelters, outdoor shade sails are attractive as well as practical. They create a stunning functional design feature in both public and private settings.

- Sophisticated patio areas
- Large outdoor spaces
- Small seating areas
- Children's play areas
- Public spaces
