

# Financial Organizational Resilience

Business Continuity solutions focused on the unique needs of the financial industry

Virtual Corporation has designed and implemented Business Continuity Plans (BCPs) for many financial and banking organizations. From resilience and recovery planning, building engagement, training and testing, we come alongside our clients' to support them as they plan and implement their programs through any situation, at all times. Our goal is to ensure continuous business operations and service with the least possible impact in the event of any type of emergency, business disruption or other unforeseen circumstances.

Whether you need flexible BCP software, comprehensive consulting services or both, our tried and true solutions address the key elements of Life Safety, Business and Technology Recoverability and Risk (both internal & external). These plans help our financial organizations ensure that their customers have access to their funds and securities-related data during all significant business disruptions (SBDs). This includes local or regional events such as natural disasters, fires, power outages, acts of malice, and technical or infrastructure disruptions. Don't wait for an incident to occur. We will come alongside and support your efforts and provide guidance and test your plans.

Virtual Corporation offers financial industry continuity plans that cover unexpected events ranging from building-specific events (such as an isolated technology problem or fire) to regional issues such as earthquakes and hurricanes to national or worldwide issues including cyber security attacks.

Virtual Corporation is business continuity management (BCM) solutions compliant with:

- Federal Financial Institution's Examination Council (FFIEC),
- Financial Industry Regulatory Authority (FINRA),
- Financial Services Authority (FSA) and more.

**Undeniable flexibility. Passionate client focused. Profound knowledge.**
