- + Pathology
- + Environmental Health and Safety
- + Emergency Department
- + Physician Services
- + Patient Billing
- + Medical School

We understand that the Healthcare industry has unique regulations and requirements. More so than any other industry, business continuity planning in the Healthcare environment directly impacts individual lives.

In healthcare, business continuity planning requires special focus because it's critical functions have increasingly become dependent on information technology (IT) systems. Medical care routinely depends on information technology systems & patient data. Therefore, healthcare recovery planning must address life safety, and the recovery of these critical systems throughout every phase of response.

This is why Virtual Corporation promises you an extraordinary commitment to areas of healthcare business continuity management (BCM), including engaging leadership and gaining their commitment to resourcing an appropriately scaled BCM program rather than expecting already loaded emergency management resources to take this on. Our solutions are intuitive and optimized for hospitals and the healthcare enterprise.

Our planning software, Sustainable Planner®, comes out-of-the-box with CMS, HIPAA & ISO compliant templates for business impact analysis, recovery planning, emergency management, hazard vulnerability assessments, and IT disaster recovery.

Undeniable flexibility. Passionate client focused. Profound knowledge.

Command Resilience with Sustainable Planner

Take control of your organizational resilience with our smart and intuitive Sustainable Planner. This powerful software is easy to navigate, allows for roles-based planning and user interface. Our tool will keep your continuity program dynamic, automated and integrated today, and as your program evolves in the years to come.

Customize Healthcare specific Solutions and Templates

From branding capabilities to operational functionality, nothing beats Sustainable Planner's ability to customize or use right out-of-the-box. Choose from sector-specific templates such as CMS, HIPAA and ISO compliant with demonstrated best practices in business continuity, IT disaster recovery & resilience that can optimize your outcomes and mitigate risk.

Access the Industry's Top Experts

From our founder, to our expert continuity consultants, IT experts, software engineers, customer team, and consulting partners, Virtual Corporation gives you access to the top minds in Healthcare business continuity and risk management, disaster recovery.

Why settle for anything than the best?
