MICROBE PREVENTION

6 months: **High Traffic Surfaces**

2 years: **Indoor/Outdoor**

10 years: **HVAC Ducts**

25 years: **Enclosed Surfaces**

BIODOOR DUAL LAYER FORMULA

High-tech polymer microscopically binds EPA registered biocides and fungicides to virtually any indoor/outdoor surface. This invisible binding process helps it prevent mold, mildew, germs and musty odors through 100's of wet-dry cycles.

Competitive products get rinsed away when first exposed to water or condensation.

Residential & Commercial remediation, restoration, repairs, remodeling, new home construction, schools, office buildings, hotels, health clubs, mold and germs are everywhere!

High Traffic Surfaces

bathrooms, kitchens, floors, carpets, upholstery, fabrics, desks, tables, chairs, door knobs, bedspreads

Indoor/Outdoor Surfaces

drywall, stucco, wood, cement, metal, bricks, vinyl, rubber, tile, decks, fences, patio furniture and cushions, awnings, roofing, siding, gutters, boats, RVs, etc.

Enclosed Surfaces

attics, crawl spaces, wall/stud cavities, insulation, drop ceilings, closets, etc.

That Lasts Through
100's of Wet-Dry Cycles

Mold - Mildew - Germs - Musty Odors

**Non-Toxic
Non-Corrosive
No Harmful Fumes**

**Rain or Condensation
Can Cause Future Mold Growth
Protect Your Health and Investment
With Endurance BioBarrier
Mold Prevention Spray**

SAFE TO APPLY ON ALL SURFACES

First get any applicable water leak or condensation problems fixed.

If it's a mold remediation or restoration project, your professional service provider should follow IICRC S520 or similar guidelines before applying.

On clean indoor/outdoor surfaces, your applicator will apply a light coating that creates a microscopic, invisible barrier.

Only takes about an hour to air dry.

A light, harmless scent may be detected when spraying, but odorless when dry.

Non-Toxic. Non-Corrosive. Zero VOCs.

WHY WORRY ABOUT MOLD AND MILDEW?

An EPA study has linked asthma and respiratory illnesses to indoor air quality problems caused by dampness and mold in homes or offices.

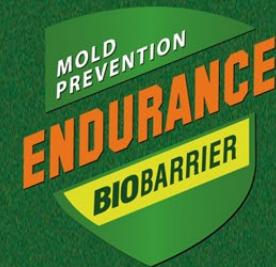

Other studies have shown that many homes and offices have undetected mold and indoor air quality problems.

Mayo Clinic researchers have shown that most of America's 37 million chronic sinus infections are caused by mold.

After the owner of a new home in California determined it was moldy lumber that made his child seriously ill, he successfully sued the contractor for \$9.6 million and lumberyard for \$13 million.
